Community Insight

Community Insight for housing organisations

Community Insight gives you the data and analysis you need to ensure your services are underpinned by the best possible knowledge of local communities, levering the power of information right across your organisation, from high-level visualisations for Board level to detailed reports on local neighbourhoods.

Saving you time and money, Community Insight gives you the most relevant and up-to-date data on the communities where you work, with no need to invest in specialist mapping and data staff, consultancy or software.

- Upload details of your stock to our secure servers, and get up and running in minutes with data and reports for your properties, neighbourhoods and estates.
- Understand what the latest sources such as Census 2011 mean in your areas, as soon as data is released.
- Get the information you need for a joined-up approach to community investment.
- Tools to help frontline staff to take strategic responsibility for their patches.
- Data to help prioritise scarce resources, and provide baselines & trends for assessing impact.

HACT and OCSI

Community Insight is a joint project from HACT and OCSI.

HACT helps housing providers build stronger neighbourhoods and resilient communities. See www.hact.org.uk for more.

OCSI develop and interpret the evidence base to help the public and community organisations deliver better services. A 'spin-out' from the University of Oxford Social Policy Institute, OCSI have worked with more than 100 public and community sector clients at local, national and international level. See www.ocsi.co.uk for more.

This is version 2.3 of the Community Insight profile datasets and report

This report was created on 8 January 2024.

About the indicators

Information published by government as open data – appropriately visualised, analysed and interpreted – is a critical tool for housing organisations to improve their strategic and joined-up approach to community investment.

OCSI collect all local data published by more than 50 government agencies, and have identified key indicators relevant to the housing sector community investment to use in this report and the interactive webtool (www.communityinsight.org).

All indicators are updated with latest data within days of being published by government.

How we have identified the "Heathside & Lethbridge, Lewisham" area

This report is based on the stock property location data (postcodes) loaded into Community Insight by Peabody, and the definition of the "Heathside & Lethbridge, Lewisham" area (you can view this area on the Community Insight tool, either in the drop-down menu at the top-left of the map-page, or on the "Stock group" page if you are logged-in as an administrator). We have aggregated data for all the neighbourhoods in "Heathside & Lethbridge, Lewisham" that contain stock, to create the data used in this report.

Alongside data for the "Heathside & Lethbridge, Lewisham", we also show data for your selected comparator areas: Social housing areas and London. The comparson area 'Social Housing Areas' is a custom geographical area comprising of all Output areas containing at least 20 properties owned by any Housing Association (based on Census data).

Community Insight

Population: Age and gender

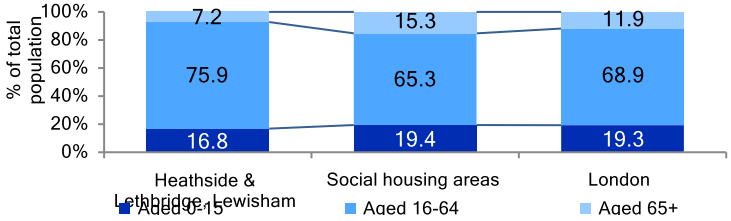

What information is shown here?

The information on this page shows the number of people living in Heathside & Lethbridge, Lewisham. These population figures provide detail of the structure of the population by broad age bands and sex.

The first information box shows the total number of people usually resident in the area, with the male female breakdown. Also shown are numbers by age, and the 'dependency ratio'. This is the ratio of non-working age (those aged 0-15 and over 65) to working age population and is useful in understanding the pressure on a productive population in providing for the costs of services and benefits used by the youngest and oldest in a population. For example, a ratio of 25% would imply one person of non-working age for every four people of working age.

The population pyramid compares the proportion of males and females by five-year age bands. The line chart shows how the population is changing over time in Heathside & Lethbridge, Lewisham and comparator areas. The stacked bar chart, below, shows the age breakdown of the population in Heathside & Lethbridge, Lewisham and comparator areas by broad age band.

Figure: Population by age
Source: Census 2021

Total Population	Aged 0-15	Working age population	Aged 65+	Dependency ratio
4,062	684	3,084	294	0.32
47.2% male; 52.8% female	16.8% (London average = 19.3%)	75.9% (London average = 68.9%)	7.2% (London average = 11.9%)	London average = 0.45

Population: Ethnicity

What information is shown here?

The information on the right shows the number of people in Heathside & Lethbridge, Lewisham by ethnicity, based on each person's perceived ethnic group and cultural background.

The information boxes display the number of people who have identified themselves as White British and the number from non-White ethnic minority groups, as well as the five broad ethnic minority groups (White non-British, Mixed, Asian, Black and other ethnic groups.

The final information box shows the proportion of households where not all household members are of the same ethnicity (households with multiple ethnic groups).

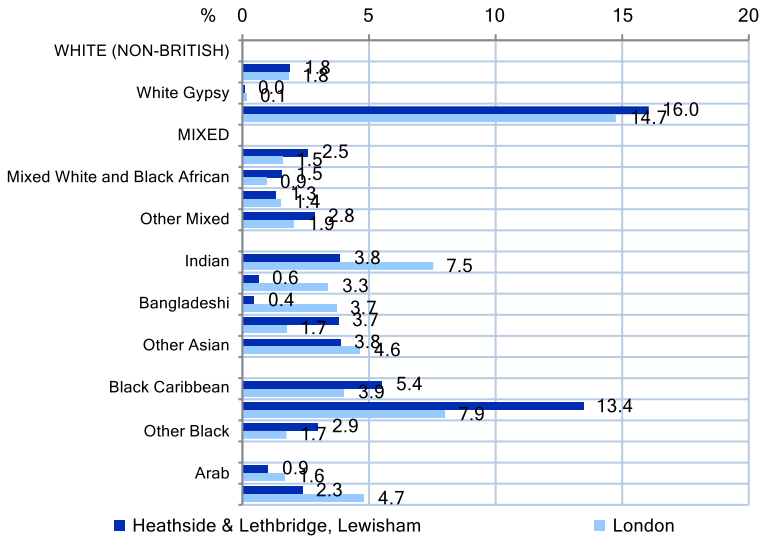

The bar chart on the right shows a detailed breakdown of the percentage of people in ethnic minority groups by ethnic category.

White British	Non-White	White non-British	Mixed
1,487	1,842	741	327
36.5% (London average = 36.8%)	45.3% (London average = 46.2%)	18.2% (London average = 17.0%)	8.0% (London average = 5.7%)

Asian	Black	Other ethnic group	Households with multiple ethnicities
499	884	132	497
12.3% (London average = 20.7%)	21.7% (London average = 13.5%)	3.2% (London average = 6.3%)	26.4% (London average = 22.3%)

Population: Country of birth and household language

What information is shown here?

The information on the right shows the number of people in Heathside & Lethbridge, Lewisham by country of birth.

The top row information boxes display the number of people in Heathside & Lethbridge, Lewisham who were born in England and outside the UK as well as the number of people with a UK passport and non-UK passport.

The second row information boxes show the language breakdown of households, identifying the number of households in Heathside & Lethbridge, Lewisham with one or more members who cannot speak English.

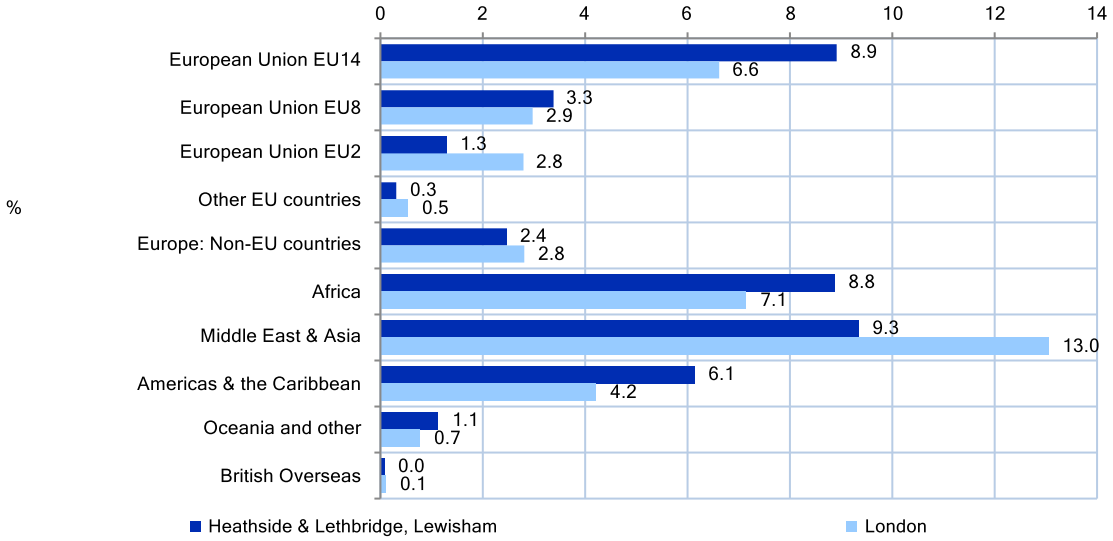

The bar chart on the right shows a detailed breakdown of the percentage of people in Heathside & Lethbridge, Lewisham born outside of England by the geographic region of birth.

Born in the UK	Born Outside the UK	With a UK passport	With a non-UK passport
2,377	1,691	2,703	1,167
58.4% (London average = 59.4%)	41.6% (London average = 40.6%)	66.3% (London average = 71.1%)	28.6% (London average = 23.3%)

All people in households have English as main language	At least one adult (not all) has English as main language	No adults but some children have English as main language	No household members have English as main language
1,426	176	41	240
75.7% (London average = 73.2%)	9.3% (London average = 11.2%)	2.2% (London average = 3.3%)	12.7% (London average = 12.4%)

What information is shown here?

The information box shows the number and percentage of migrants in Heathside & Lethbridge, Lewisham. A migrant is defined as a person with a different address one year before Census day. The migrant status for children aged under one in households is determined by the migrant status of their 'next of kin' (defined as in order of preference, mother, father, sibling (with nearest age), other, related person, Household Reference Person).

The chart on the right shows the population turnover rate by age band. This is calculated as the rate of in or out migratory moves within England and Wales per 1,000 resident population.[1] Figures are based on GP patient register records. The left-hand bars (lighter colour) show people moving *out of* the area – higher values for a particular group indicate that this age-group is more likely to move away from the area. The right-hand bars (darker colour) show people moving *into* the area – higher values for a particular group indicate that this age-group is more likely to move into the area.

The data table on the top right and the chart on the bottom right show the total number of people registering with a National Insurance number who have come from overseas. This is a measure of the number of people who have migrated to the UK from overseas to work, who have registered for a National Insurance number in the local area.

Note: For the year 20/21 The NINO allocation process was disrupted as a result of the coronavirus (COVID-19) pandemic. This has resulted in a significant reduction in the number of NINOs allocated.

People who have moved address within the last 12 months (Census 2021)	Overseas migrants (National Insurance no. registrations of overseas nationals) (DWP 2022/23)
671	185
16.8% (average = 12.7%)	6.1% (average = 5.3%)

Population: All households

What information is shown here?

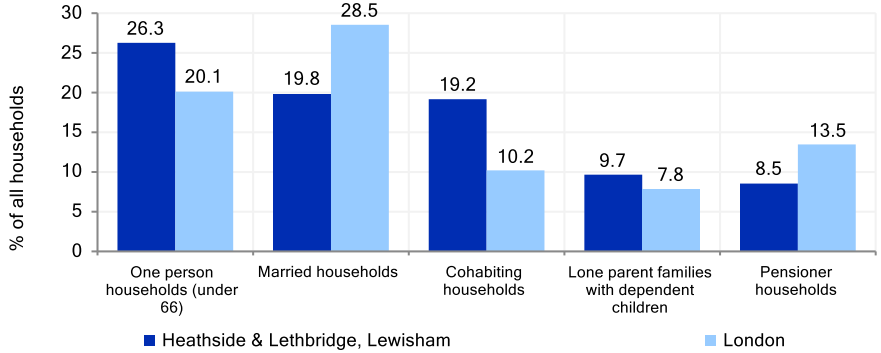

The information on this page shows the composition of household types in Heathside & Lethbridge, Lewisham. The information boxes contain the number of households in Heathside & Lethbridge, Lewisham classified under the main household composition breakdowns. The chart on the right shows the same information as a percentage of all households, with comparator areas.

Pensioner households	One person households (aged under 65)	Lone parent families with dependent children
160	492	181
8.5% (London average = 13.5%)	26.3% (London average = 20.1%)	40.5% of all families with dependent children (London average = 25.0%)

Married households	Cohabiting households	Other households
371	359	210
19.8% (London average = 28.5%)	19.2% (London average = 10.2%)	11.2% (London average = 9.7%)

What information is shown here?

The information on the right shows the number of people living in Heathside & Lethbridge, Lewisham by religious belief, categorised by the six major religions, other religion and no religion.

The bar chart shows the percentages of people in Heathside & Lethbridge, Lewisham and comparator areas who are of non-Christian religious belief, displayed by religion.

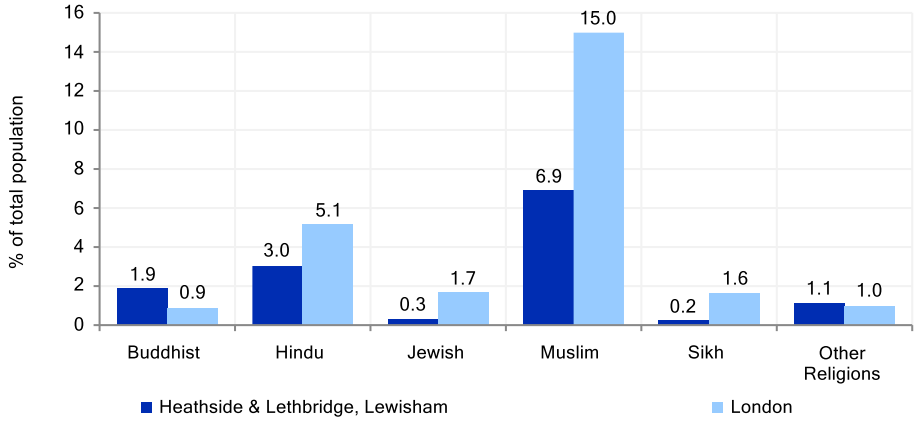

Note, figures in the table and charts may not add up to 100% because they do not include figures for those for who did not reply to the religion question – who were recorded as 'religion not stated' in the census data publication.

Christian	Buddhist	Hindu	Jewish
1,622	77	123	11
39.9% (London average = 40.7%)	1.9% (London average = 0.9%)	3.0% (London average = 5.1%)	0.3% (London average = 1.7%)

Muslim	Sikh	Other religion	No religion

Vulnerable groups: People out of work (1)

What information is shown here?

The information in this section shows counts of people who are out of work and receiving workless benefits: Jobseekers Allowance (JSA)/Universal Credit (UC) and Incapacity Benefit (IB)/Employment and Support Allowance (ESA).

JSA is payable to people under pensionable age who are available for, and actively seeking, work of at least 40 hours a week. A subset of UC claimants (claimants in the 'searching for work' conditionality group) are additionally included in the 'Unemployment Benefit' count, as UC is slowly replacing JSA for new claims. *Note, 'the searching for work' conditionality group includes a small number of claimants who would not be considered unemployed under the previous JSA benefits regime e.g. those with work limiting illness awaiting health checks. Therefore, there is likely to be a slight overcount of the proportion of Unemployed Benefit claimants in areas where the UC rollout is more advanced.*

IB and ESA are workless benefits are payable to people who are out of work and have been assessed as being incapable of work due to illness or disability and who meet the appropriate contribution conditions. *Note, since March 2016, ESA is being replaced by UC for new claimants. It is not possible to capture the total number of claimants of sickness benefits as the UC does not provide a breakdown for health condition; therefore, the total count of ESA/IB claimants presented here is likely to be an underestimate of the full count of those workless and receiving benefits due to sickness or disability.*

The information boxes on the top right show: the total number of adults (aged 16-64) receiving JSA and UC; the total claiming for more than 12 months; claimants aged 18-24 and 50+, the number of people receiving 'Incapacity benefits' (IB or ESA); and the number and proportion of 16-64 year olds receiving workless benefits (UC, JSA, IB or ESA).

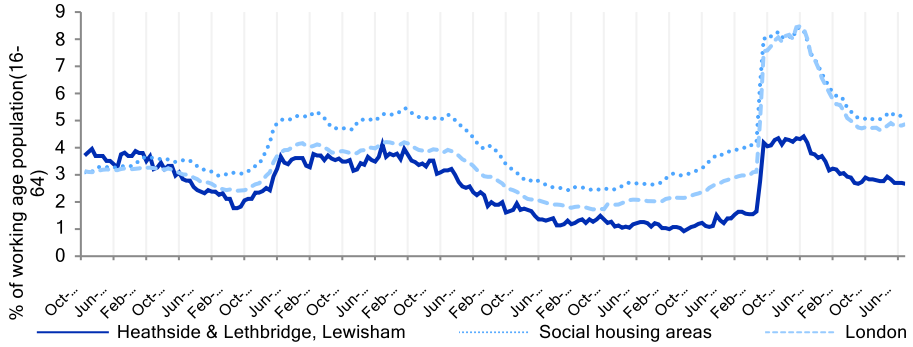

Unemployment Benefit (JSA and UC) claimants (Aug-23)	Youth unemployment (JSA/UC claimants aged 18-24) (Aug-23)	Older unemployed (JSA/UC claimants aged 50+) (Aug-23)
81	18	19
2.7% (London average = 4.9%)	6.1% (London average = 5.7%)	2.5% (London average = 2.9%)

Male unemployment claimants (JSA and UC) (Aug-23)	Female unemployment claimants (JSA and UC) (Aug-23)	Working age workless benefit claimants * (Feb-23)	Incapacity benefits claimants (Feb-23)
41	41	139	55.0
2.8% (London average = 5.2%)	2.7% (London average = 4.6%)	4.6% (London average = 8.0%)	1.8% (London average = 3.1%)

Universal Credit: Conditionality Regime

What information is shown here?

The information in this page shows the proportion of people in receipt of Universal Credit against six levels of conditionality. Conditionality refers to work-related activities an eligible adult will have to do in order to get full entitlement to Universal Credit.

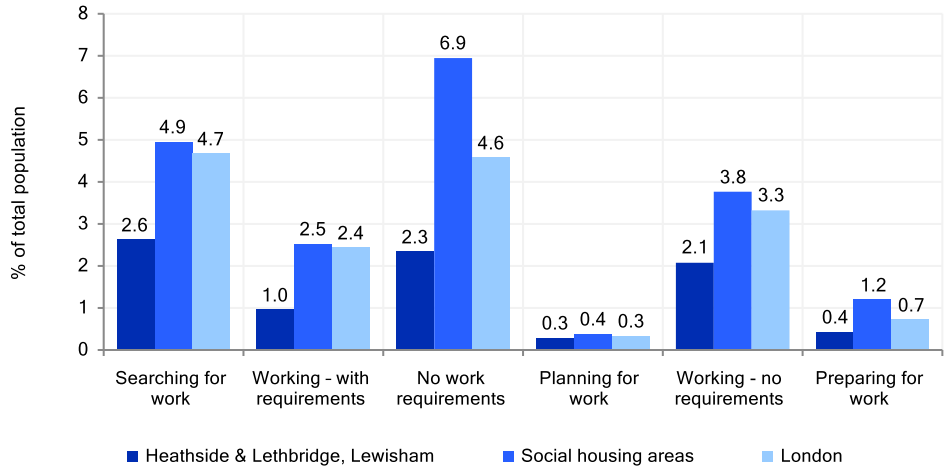

- **Searching for work:** Claimants who are not working, or with very low earnings. The claimant is required to take action to secure work - or more / better paid work. The Work Coach supports them to plan their work search and preparation activity.
- **Working with requirements:** Claimants who are in work but could earn more, or not working but has a partner with low earnings.
- **No work requirements:** Claimants who are not expected to work at present. Health or caring responsibility prevents claimant from working or preparing for work.
- **Planning for work:** Claimants who are expected to work in the future. Lone parent / lead carer of child aged 1 (Aged 1 - 2, prior to April 2017). The claimant is required to attend periodic interviews to plan for their return to work.
- **Working no requirements:** Claimants whose individual or household earnings is over the level at which conditionality applies. Required to inform DWP of changes of circumstances, particularly if at risk of decreasing earnings or losing job.
- **Preparing for work:** Claimants who are expected to start preparing for future even with limited capability for work at the present time or a child aged 2 (Aged 3 - 4, prior to April 2017), the claimant is expected to take reasonable steps to prepare for work including Work Focused Interview.

Universal Credit claimants: Searching for work (Aug-23)	Universal Credit claimants: Working with requirements (Aug-23)	Universal Credit claimants: No work requirements (Aug-23)
80	29	71
2.6% (London average = 4.7%)	1.0% (London average = 2.4%)	2.3% (London average = 4.6%)

Universal Credit claimants: Planning for work (Aug-23)	Universal Credit claimants: Working no requirements (Aug-23)	Universal Credit claimants: Preparing for work (Aug-23)
8	63	13
0.3% (London average = 0.3%)	2.1% (London average = 3.3%)	0.4% (London average = 0.7%)

What information is shown here?

The information in this page shows a breakdown of Universal Credit (UC) households by type and criteria.

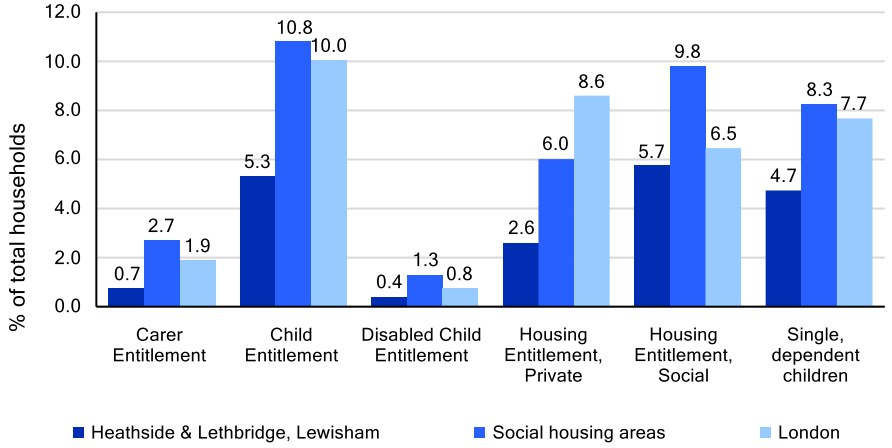

- **Carer Entitlement:** Households on UC containing household members who have regular and substantial caring responsibilities for at least 35 hours per week. Only one carer element is allowed per individual; in joint claims, two carer elements can be included providing both partners are not caring for the same disabled person.
- **Child Entitlement:** Households on UC where a child element is included in a Universal Credit award where there is responsibility for a child or qualifying young person who normally lives in the household.
- **Disabled Child Entitlement:** Households on UC where a child element is included in a Universal Credit award and the child element is increased by a disabled child addition if a child meets the criteria.
- **Housing Entitlement, Private rented:** Households on UC that are renting privately and eligible for housing entitlement. This element is to help with housing costs.
- **Housing Entitlement, Social rented:** Households on UC that are renting social housing and eligible for housing entitlement. This element is to help with housing costs.
- **Single with dependent children:** Households on Universal Credit that comprise a single person with child dependant(s).

UC households: Carer Entitlement (May-23)	UC households: Child Entitlement (May-23)	UC households: Disabled Child Entitlement (May-23)
14	100	7
0.7% (London average = 1.9%)	5.3% (London average = 10.0%)	0.4% (London average = 0.8%)

UC households: Housing Entitlement, Private (May-23)	UC households: Housing Entitlement, Social (May-23)	UC households: Single, dependent children (May-23)
49	108	89
2.6% (London average = 8.6%)	5.7% (London average = 6.5%)	4.7% (London average = 7.7%)

What information is shown here?

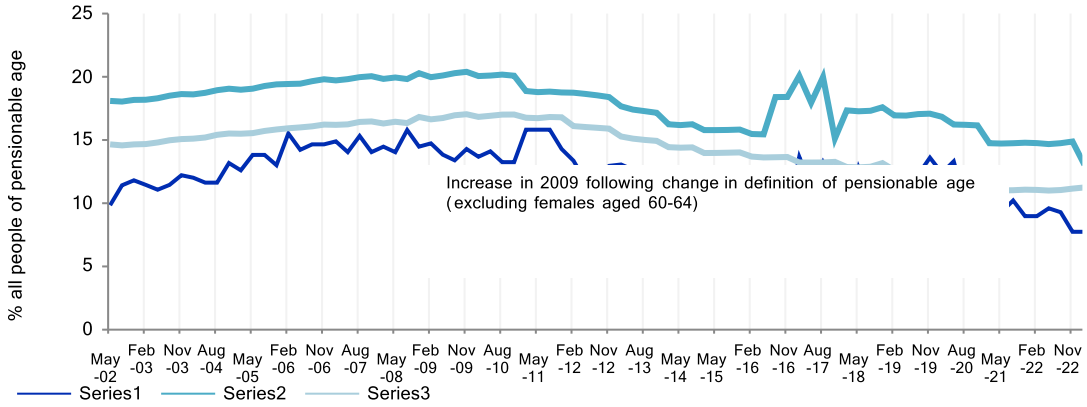

The information in this section looks at the prevalence of disability among people living in Heathside & Lethbridge, Lewisham. There are three measures of disability presented: those claiming Attendance Allowance, Personal Independence Payments and Disability Living Allowance.

Attendance Allowance is payable to people over the age of 65 who are so severely disabled, physically or mentally, that they need a great deal of help with personal care or supervision.

Until April 2013, Disability Living Allowance was payable to children and adults in or out of work who are below the age of 65 and who were disabled, and required help with personal care or had walking difficulties. It is a non-means tested benefit, which means it is not affected by income. From April 2013 Personal Independence Payments (PIP) have been introduced to replace Disability Living Allowance for all new claimants. PIP helps with some of the extra costs caused by long-term disability, ill-health or terminal ill-health.

The information boxes on the right show the total number of people receiving Attendance Allowance, Disability Living Allowance and PIP (by key breakdown) across Heathside & Lethbridge, Lewisham.

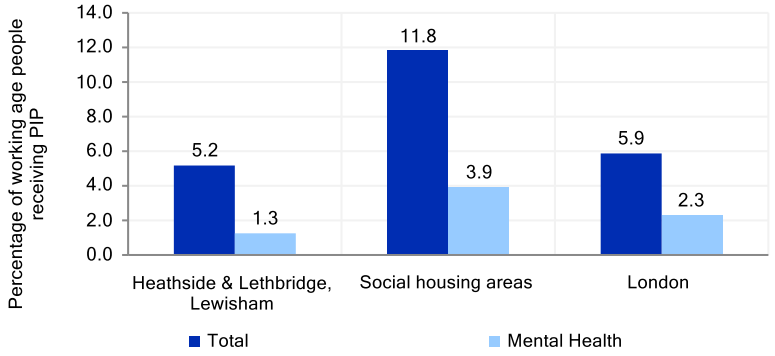

Figure: Older people with social care needs (receiving Attendance Allowance)
Source: Department for Work and Pensions

Attendance Allowance claimants (Feb-23)	Personal Independence Payment (PIP) (Jul-23)	PIP Males (Jul-23)	PIP Females (Jul-23)
25	157	40	55
7.7% of people (London= 11.2%)	5.2% of people (London= 5.9%)	2.7% of males (London= 5.2%)	3.6% of females (London= 6.5%)

PIP with mental health conditions (Jul-23)	PIP with respiratory disease (Jul-23)	Households on Universal Credit - Limited Capability for Work Entitlement (May-23)	Disability Living Allowance claimants (Feb-23)
38	00	63	36
1.3% of people (London= 2.3%)	0.0% of people (London= 0.2%)	3.4% of households (London= 4.2%)	0.9% of people (London= 1.7%)

Vulnerable groups: Working age benefit claimants (1)

What information is shown here?

The information in this page shows the number of people in receipt of key welfare benefits payable by the Department for Work and Pensions (DWP).

Working age DWP Benefits are benefits payable to all people of working age (16-64) who need additional financial support due to low income, worklessness, poor health, caring responsibilities, bereavement or disability.

Universal Credit (UC) has replaced legacy benefits for new claimants. The UC rollout began in April 2013, with single jobseeker's moving on to the new benefit and by March 2016 the rollout intensified to include other groups who are out of work or on low incomes. The chart on the right shows a breakdown of the proportion of UC claimants that are either in employment or unemployed across Heathside & Lethbridge, Lewisham and comparator areas.

Housing Benefit (HB) can be claimed by a person if they are liable to pay rent and if they are on a low income and provides a measure of the number of households in poverty.

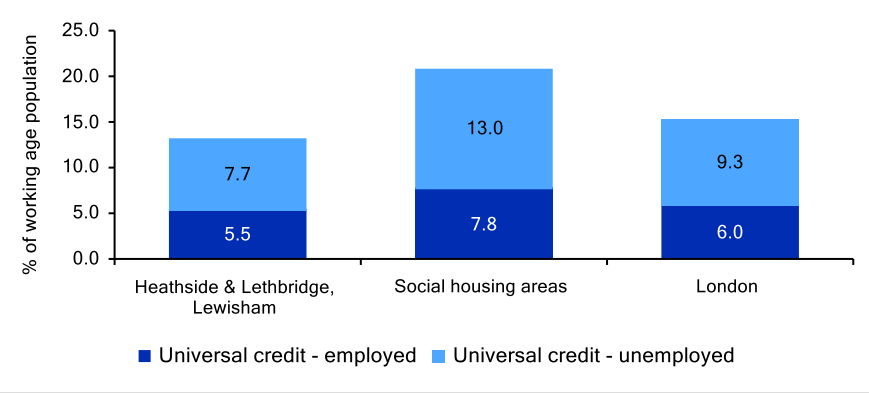

Income Support is a measure of people of working age with low incomes and is a means tested benefit payable to people aged over 16 working less than 16 hours a week and having less money coming in than the law says they need to live on.

The charts on the following page show the change in the proportion of Income Support and Housing Benefits claimants across Heathside & Lethbridge, Lewisham and comparator areas. *Note, recent changes observed in these charts can be partially attributed to the migration of claimants from legacy working age DWP benefits, Housing Benefit and Income Support towards Universal Credit.*

Universal Credit claimants – in Employment (Jan-23)	Universal Credit claimants – Unemployed (Jan-23)		
166	235		
5.5% (London average = 6.0%)	7.7% (London average = 9.3%)

Vulnerable groups: Deprived neighbourhoods (1)

What information is shown here?

The information on this page looks at overall levels of deprivation across Heathside & Lethbridge, Lewisham based on the Index of Multiple Deprivation (IMD) 2019. IMD 2019 is the most comprehensive measure of multiple deprivation available. The concept of multiple deprivation upon which the IMD 2019 is based is that separate types of deprivation exist, which are separately recognised and measurable. The IMD 2019 therefore consists of seven types, or domains, of deprivation, each of which contains a number of individual measures, or indicators.[2]

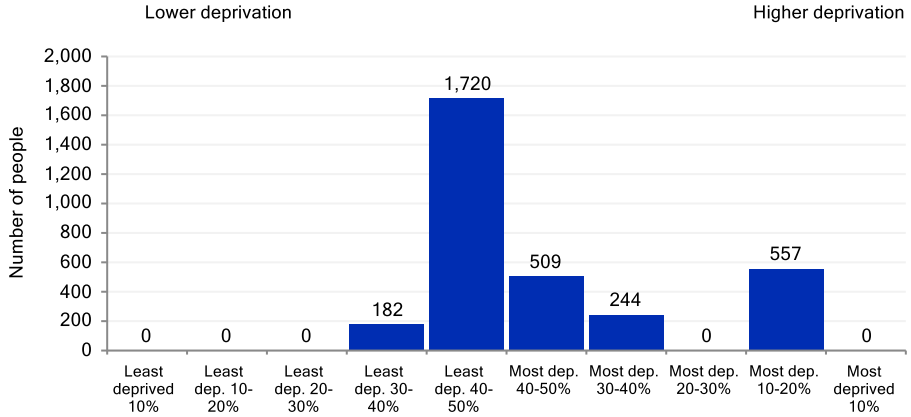

The information boxes on the right show the number of people in Heathside & Lethbridge, Lewisham living in neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on IMD 2019 and the seven IMD domains. The chart on the right shows the number of people living in neighbourhoods grouped according to level of deprivation. The charts on the following pages show the same information for each of the domains. All neighbourhoods in England are grouped into ten equal sized groups "deciles"; the 10% of neighbourhoods with the highest level of deprivation (as measured in the IMD) are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of deprivation grouped in decile 1.

Number of people in Heathside & Lethbridge, Lewisham living in the most deprived 20% of areas of England by Indices of Deprivation (ID) 2019 domain

What information is shown here?

This page looks at children in low-income families, out of work households and lone parent households. Relative low income is defined as a family in low income Before Housing Costs (BHC) in the reference year. Absolute low income is a family in low income Before Housing Costs (BHC) in the reference year in comparison with incomes in 2010/11. A family must have claimed one or more of Universal Credit, Tax Credits or Housing Benefit at any point in the year to be classed as low income in these statistics. Children are dependent individuals aged under 16; or aged 16 to 19 in full-time non-advanced education.

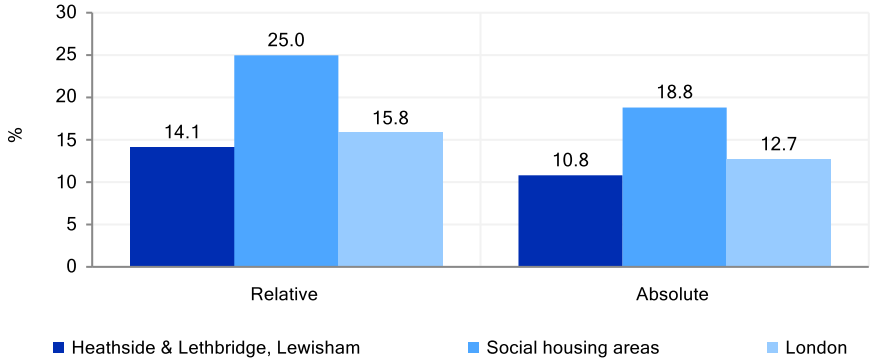

This is the first release of these statistics, which have replaced DWP's Children in out-of-work benefit households and HMRC's Personal Tax Credits: Children in low-income families local measure. See here for more information: https://www.gov.uk/government/collections/children-in-low-income-families-local-area-statistics#release

The information boxes on the right show the count of people in each of these categories in Heathside & Lethbridge, Lewisham. The bar chart shows the percentage of children in relative and absolute low-income families.

Children in relative low income families	Children in absolute low income families	Children in relative low income lone parent families	Children in relative low income out of work families
140	107	00	38
14.1% (London average = 15.8%)	10.8% (London average = 12.7%)	0.0% of relative low-income families (London average = 42.0%)	27.1% of relative low-income families (London average = 25.5%)

What information is shown here?

The information on this page looks at pensioner groups including those that may face greater risks or who may have different types of need. There are two measures included: pensioner loneliness and pensioners in poverty.

There are two indicators of pensioner loneliness. The census provides a measure of the proportion of pensioners living alone (defined as households of one pensioner and no other household members). In addition, Age Concern have developed a Loneliness Index (which predicts the prevalence of loneliness amongst people aged 65+) based on census data. Areas with a value closer to 0 predict a greater prevalence of loneliness amongst those aged 65 and over and living in households compared to areas with a value further away from 0.

Pensioners in poverty are those in receipt of Pension Credit. Pension Credit provides financial help for people aged 60 or over whose income is below a certain level set by the law.

The information boxes present information on the counts of pensioner households or pensioners in each category. The chart on the top right shows the change in the proportion of people receiving Pension Credit across Heathside & Lethbridge, Lewisham and comparator areas.

The chart on the bottom right compares Loneliness Index scores across Heathside & Lethbridge, Lewisham and comparator areas - a value closer to 0 predicts a greater prevalence of loneliness amongst those aged 65.

Households of one pensioner (Census 2021)	State pension claimant (DWP: Feb-23)	Pension credit claimant (DWP: Feb-23)
123	224	52
76.9% of pensioner households (London average = 67.9%)	69.3% (London average = 85.2%)	31.0% (London average = 17.0%)

Vulnerable groups: Households with multiple needs

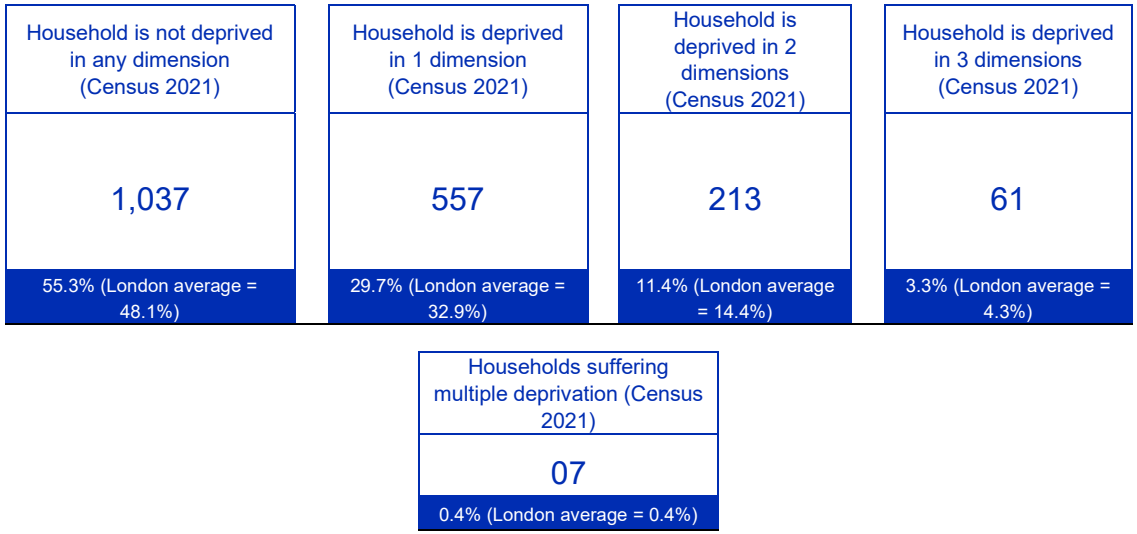

What information is shown here?

The information on this page looks at household deprivation and households with multiple deprivation.

The information boxes show the number of households which are deprived in one of the four Census 2021 deprivation dimensions. The Census 2021 has four deprivation dimension characteristics: a) Employment: Any member of the household aged 16-74 who is not a full-time student is either unemployed or permanently sick; b) Education: No one has at least level 2 education and no one aged 16 to 18 years is a full-time student c) Health and disability: Health and disability: Any member of the household is disabled d) Housing: The household's accommodation is either overcrowded; OR is in a shared dwelling OR does not have sole use of bath/shower and toilet OR has no central heating. These figures are taken from responses to various questions in the 2021 census.

Households with multiple deprivation are households experiencing four key measures of deprivation:

- All adult household members have no or low qualifications
- At least one household member is out of work (due to unemployment or poor health)
- At least one household member has a disability
- The household is living in overcrowded conditions

© OCSI/HACT 2023.

What information is shown here?

The information on this page looks at the number and proportion of people in two groups with specific needs: mental health issues and people providing unpaid care.

The figures for people with mental health issues are based on Employment Support Allowance/Incapacity Benefit claimants who are claiming due to mental health related conditions. Incapacity Benefit is payable to persons unable to work due to illness or disability.

Informal care figures show people who provide any unpaid care by the number of hours a week they provide that care. A person is a provider of unpaid care if they give any help or support to another person because of long-term physical or mental health or disability, or problems related to old age.

The line chart on the right shows the change in the number of people claiming Incapacity benefit for mental health reasons as a proportion of the working age population and the chart below it includes figures for children and all people providing unpaid care across Heathside & Lethbridge, Lewisham.

Mental health related benefits (DWP Feb-23)	People providing unpaid care (Census 2011)	Unpaid care (50+ hours per week) (Census 2011)
24	214	52
0.8% of working age adults (London average = 1.5%)	5.6% (London average = 7.2%)	1.4% (London average = 2.0%)

Housing: Type

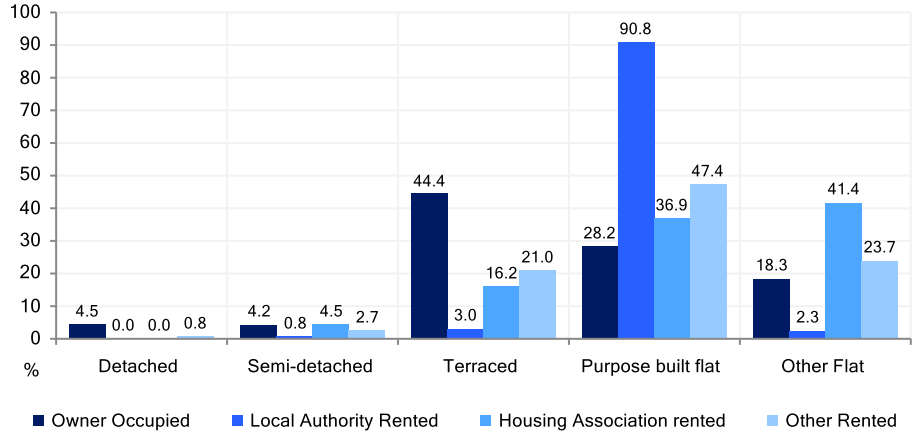

What information is shown here?

The information on this page looks at the type of dwelling space people live in. A dwelling space is the accommodation occupied by an individual household or, if unoccupied, available for an individual household, for example the whole of a terraced house, or a flat in a purpose-built block of flats.

An information box on second addresses is also included showing the proportion of the total population with a second address type.

The information boxes to the right show the number of people in Heathside & Lethbridge, Lewisham living in each accommodation type. The chart on the right shows a breakdown of households by accommodation type across Heathside & Lethbridge, Lewisham and comparator areas. The chart below shows a breakdown of households by accommodation type across Heathside & Lethbridge, Lewisham and comparator areas and the chart on the right compares the accommodation types of owner occupied, Local Authority rented, Housing Association rented and private rented households across Heathside & Lethbridge, Lewisham.

Housing: Tenure

What information is shown here?

The information on this page looks at the tenure of housing in Heathside & Lethbridge, Lewisham. The information boxes show the number of households broken down by tenure type and the chart shows the tenure breakdown across Heathside & Lethbridge, Lewisham and comparator areas.

- 'Owner occupied' housing includes accommodation that is either owned outright, owned with a mortgage or loan, or shared ownership (paying part rent and part mortgage).
- 'Social rented' housing includes accommodation that is rented from a council (Local Authority) or a Housing Association, Housing Co-operative, Charitable Trust, Non-profit housing company or Registered Social Landlord.
- 'Rented from the Council includes accommodation rented from the Local Authority
- 'Housing Association or Social Landlord' includes rented from Registered Social Landlord, Housing Association, Housing Co-operative, Charitable Trust and non-profit housing Company.
- 'Private rented or letting agency' includes accommodation that is rented from a private landlord or letting agency.
- 'Other Rented' includes employer of a household member and relative or friend of a household member and living rent free.

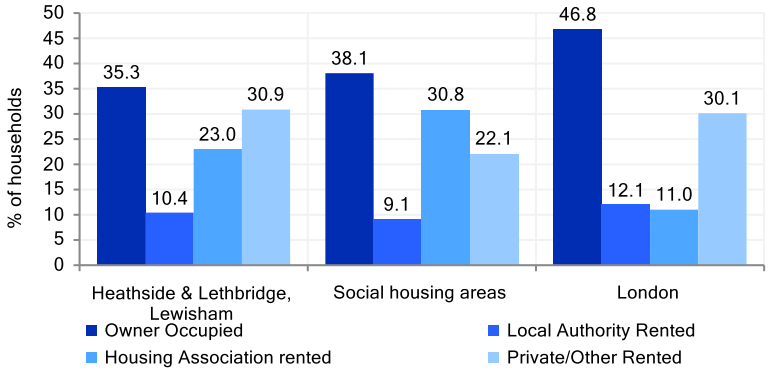

Owner occupied	Owner-occupied: owned outright	Owner-occupied owned: with mortgage or loan
664	134	420
35.3% (London average = 46.8%)	7.1% (London average = 20.7%)	22.4% (London average = 24.5%)

Owner-occupied: shared ownership	Social rented households	Rented from Council
110	629	196
5.9% (London average = 1.5%)	33.5% (London average = 23.1%)	10.4% (London average = 12.1%)

Rented from Housing Association or Social Landlord	Rented from private landlord or letting agency	Other rented dwellings
433	548	32
23.0% (London average = 11.0%)	29.2% (London average = 27.6%)	1.7% (London average = 2.5%)

Housing: How affordable is local housing? (1)

What information is shown here?

The information in this section shows measures of housing costs in Heathside & Lethbridge, Lewisham. Data on house prices is from the Land Registry open data price-paid dataset (www.landregistry.gov.uk/market-trend-data/public-data/price-paid-data), which is updated monthly.

House prices by dwelling type

The information boxes on the right and the top-left chart on the following page show the mean house prices by accommodation type across Heathside & Lethbridge, Lewisham and comparator areas for four key dwelling types (detached houses, semi-detached houses, flats and terraced houses). The bottom-left chart on page 25 shows the 10-year inflation adjusted average change in house prices across Heathside & Lethbridge, Lewisham and comparator areas.

The top-right chart on page 25 displays the monthly change in the number of transactions and average price across Heathside & Lethbridge, Lewisham and the bottom-right chart displays the ratio of the number of residential property transactions (Land Registry Oct16-Sep17) to the number of owner occupied and privately rented dwellings (Census 2011) – an approximate measure of the proportion of housing stock that has change hands of the year, or the housing 'churn'.

Council tax bands

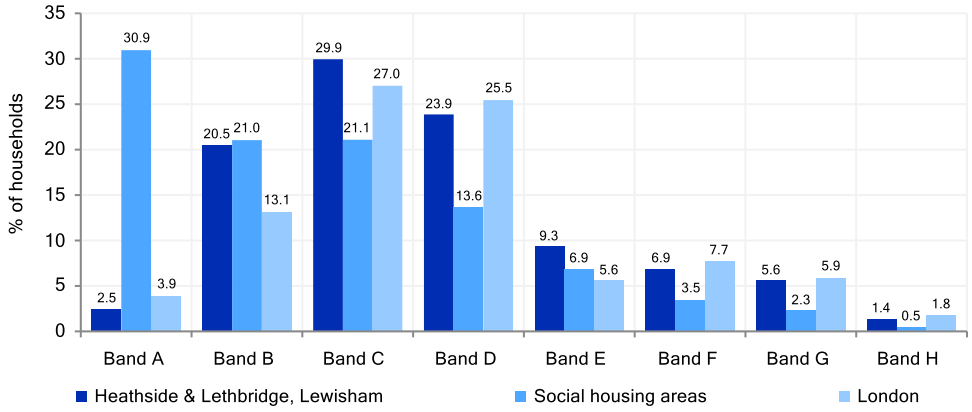

The data on Council Tax bands shows the number (and proportion) of houses in bands A, B or C (the lowest price bands) and F, G and H (the highest price bands) locally. These price bands are set nationally, so can be used to show how the cost of all local property (not just those properties that have recently been sold) compares with other areas; the chart on the right compares Heathside & Lethbridge, Lewisham and comparator areas for these Council Tax bands.

Average house price (all types of housing) (Land registry Jun-22 to May-23)	Average house price (detached) (Land registry Jun-22 to May-23)	Average house price (flats) (Land registry Jun-22 to May-23)
£547,392		£426,469
London average = £710,823	London average = £1,375,736	London average = £546,184

Average house price (semi-detached) (Land registry Jun-22 to May-23)	Average house price (terraced) (Land registry Jun-22 to May-23)	Households in Council Tax Band A (Valuation Office Agency (VOA) 2022)
	£716,000	36
London average = £818,121	London average = £828,612	2.5% (London average = 3.9%)

Households in Council Tax Band B (VOA 2022)	Households in Council Tax Band C (VOA 2022)	Households in Council Tax Band F-H (VOA 2022)
300	439	203
20.5% (London average = 13.1%)	29.9% (London average = 27.0%)	13.8% (London average = 15.3%)

Housing: How affordable is local housing? (3)

What information is shown here?

The information in this section combines measures of local house prices and local earnings to provide a more balanced picture of housing affordability.

There are three indicators displayed here: **housing affordability gap**, **savings ratio** and **total affordability ratio**. Each of these indicators is given for two measures of house price: the average (median) house price and the lower quartile house price. The lower quartile house price is set such that the cheapest 25% of houses fall within this price and is a measure of the cost of cheaper, more affordable housing in the area.

Housing affordability gap: An estimate of the gap between the cost of local houses and the amount residents can borrow. This is defined as the difference between the local house price (either median or lower quartile) and 4.5 times local annual earnings (mortgage lenders are typically willing to lend 4-5 times annual salaries). Higher figures represent more unaffordable houses.

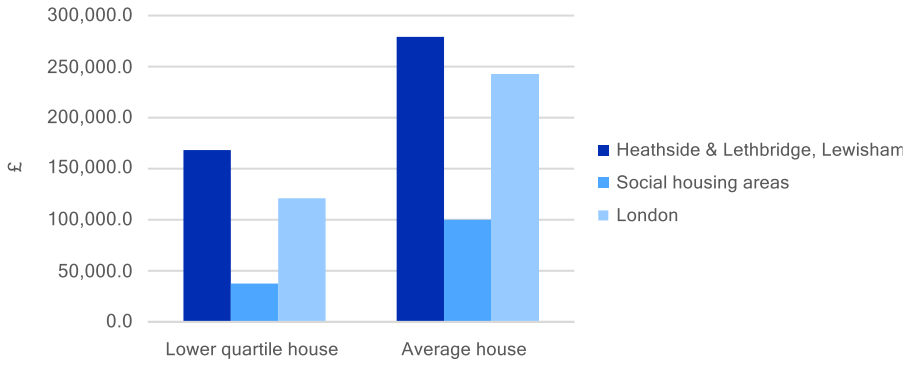

Savings ratio: The ratio between 15% of the house price (an estimate of the savings required for a deposit) and monthly earnings. It can be interpreted as the number of months' worth of earnings required for a deposit (not accounting for inflation or changes in earnings or house prices).

Total affordability ratio: This is the ratio between the total house price and annual earnings. It can be interpreted as the number of years' worth of earnings required for a deposit (not accounting for inflation or changes in earnings or house prices).

The data for these measures come from the ONS House Price Statistics for Small Areas (HPSSA) and ONS Income Estimates. Earnings data is published at MSOA level and house price data is published at LSOA level and above) Where necessary, we have modelled data to LSOA and OA geographies. The methodology used to produce these statistics is based ONS's housing affordability analysis.

Lower quartile house price ('affordable housing')	Average house price
Affordability gap	Affordability gap
£168,257	£279,147
London average = £121,021	London average = £242,821
Savings ratio (months of earnings for a deposit)	Savings ratio (months of earnings for a deposit)
15.26	19.48
London average = 13.79	London average = 19.24
Total ratio (years of earnings for a house)	Total ratio (years of earnings for a house)
7.42	9.26
London average = 6.87	London average = 9.25

Housing: Central heating, household overcrowding and dwelling size

What information is shown here?

The information on this page details indicators of the built environment: overcrowded housing, vacant housing, population density, the size of housing units and the proportion of households lacking central heating.

A household's accommodation is described as 'without central heating' if it had no central heating in any of the rooms (whether used or not). The data also shows breakdowns by tenure. This enables users to compare differences in the proportion of households with inadequate heating supply in the owner occupied, social rented and private rented sectors.

Households are classified as overcrowded if there is at least one room fewer than needed for household requirements using standard definitions. The standard used to measure overcrowding is called the 'occupancy rating' which relates to the actual number of rooms in a dwelling in relation to the number of rooms required by the household, taking account of their ages and relationships. The room requirement states that every household needs a minimum of two common rooms, excluding bathrooms, with bedroom requirements that reflect the composition of the household. The occupancy rating of a dwelling is expressed as a positive or negative figure, reflecting the number of rooms in a dwelling that exceed the household's requirements, or by which the home falls short of its occupants' needs.

Vacant dwellings are households that do not have any usual residents. This includes households that may still be used by short-term residents, visitors who were present on census night, or a combination of short-term residents and visitors. It also includes vacant household spaces and household spaces that are used as second addresses.

Population density (persons / sq km)	Houses lacking central heating (2021)	Overcrowded Housing (2021)
12530.5	47	252
London average = 5597.6	2.5% (London average = 2.2%)	13.4% (London average = 15.8%)

Vacant Dwellings (2011)	Dwellings with 2 rooms or fewer (2021)	Dwellings with 8 or more rooms (2021)
50	635	39
4.6% (London average = 3.6%)	33.7% (London average = 21.3%)	2.1% (London average = 2.1%)

Average dwelling size (persons) (2011)
2.28
London average = 2.47 people)

Housing: Domestic gas and electricity consumption

What information is shown here?

The Department for Business, Energy and Industrial Strategy publishes small area estimates of domestic gas and electricity consumption in megawatt hours (Mwh). Gas consumption data are weather corrected annual estimates of consumption for all domestic meters. A similar methodology is used for collecting domestic electricity consumption data; however, these values are not weather corrected. The methodologies are sufficiently similar that summing the electricity consumption and gas consumption gives an estimate of total annual energy consumption.

The data on this page were originally published by BEIS at postcode level and have been designated as experimental statistics. Experimental statistics are statistics that are new and subject to possible changes to meet user needs or that do not meet the rigorous quality standards of National Statistics. To avoid disclosure, postcodes are excluded if they contain less than 6 meters or that have average consumption figures of 0 or 1.

The estimated number households not connected to the gas network is based on the difference between the number of households and the number of domestic gas meters.

To read more about the data and methodology here please visit https://www.gov.uk/government/collections/sub-national-electricity-consumption-data

Electricity consumption (Mwh)	Gas consumption (Mwh)	Households not connected to the gas network (2021)
4,076	7,942	0,529
(2.80 Mwh per meter) London average = 3.61 Mwh per meter	(11.49 Mwh per meter) London average = 13.99 Mwh per meter	(36.63% of households) London average = 17.84%

Housing: Energy efficiency of domestic buildings

What information is shown here?

This page details the energy efficiency ratings of domestic buildings within Housing Neighbourhood.

The data are taken from Energy Performance Certificates (EPC) for domestic buildings published by MHCLG at postcode level and have been aggregated to Output Areas. These include those recorded between January 2017 and December 2021.The definitions of the measures on the right are given below.

The energy efficiency rating, expressed in Standard Assessment Procedure (SAP) points, is a score between 1-100 with 1 being poor energy efficiency and 100 being excellent energy efficiency. The current average rating of buildings is given alongside the potential rating (if improvements to the buildings were made) and the difference between the two - the 'energy efficiency gap'.

The number and proportion of buildings have been split into three bands of energy efficiency rating; A-C, D-E and F-G, where band 'A' EPC rating is the most efficient. Please be aware that these figures do not account for all domestic buildings in an area.

Only homes that have been built, bought, sold or retrofitted since 2008 have an EPC, which represents about 50 to 60 per cent of homes within a local authority area. Additionally, data has not been published where the holder of the energy certificate has opted-out of disclosure, energy certificates are excluded on grounds of national security or energy certificates are marked as "cancelled" or "not for issue". Only postcodes that match the ONS postcode file directory have been included.

Energy efficiency rating, current (SAP points)	Energy efficiency rating, potential (SAP points)	Energy efficiency gap (SAP points)
76.24	82.55	6.31
London average = 65.13	London average = 79.16	London average = 14.03

Band A buildings, current	Band A buildings, potential	Difference between current and potential
1465	224	4
(86.53%) London average = 50.80%	(13.23%) London average = 47.48%	(0.24%) London average = 1.72%

Source: MHCLG. Data collected between Jan 2017- Dec 2021.

Housing: Dwellings by age of dwelling

What information is shown here?

The information on this page shows the number of domestic properties (the 'dwelling stock') broken down by age of property (when the property was constructed). The rate figures refer to the proportion of all properties whose build age is known.

Built before 1900	Built between 1900 and 1939	Built between 1945 and 1999	Built after 2000
412	96	305	620
28.1% (London average = 21.4%)	6.5% (London average = 31.2%)	20.8% (London average = 30.7%)	1.4% (London average = 2.0%)

Housing: Communal establishment residents

What information is shown here?

The information on this page shows the number of people living in communal establishments from 2021 Census. It also includes breakdowns by the main types from 2011 Census, where the latest release is not currently available at the geographic level required by the Community Insight tool.

A communal establishment is defined as an establishment providing managed residential accommodation. Managed means full-time or part-time supervision of the accommodation.

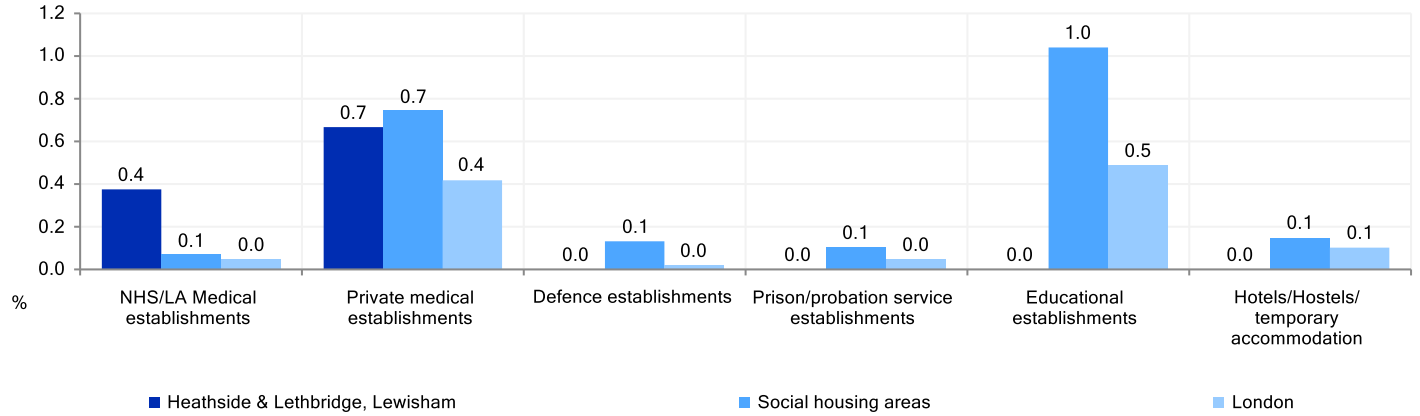

The information boxes on the right show the number and proportion of people in communal establishments by main type of establishment. Medical and care establishments include psychiatric hospital / homes, other hospital homes children's homes, residential care homes, nursing homes managed by the NHS, Local Authority or private organisation; Educational establishments include primarily University halls of residence; Defence establishments include barracks, air bases and naval ships; Other establishments include prison service establishments, bail hostels, hotels, boarding houses or guest houses, hostels and civilian ships.

The chart on the top right provides the same information with associated comparator areas.

All in communal establishments (2021)	Medical and care establishments (2011)	Education establishments (2011)	Defence establishments (2011)	Other establishments (2011)
26	25	00	00	12
0.6% (London average = 1.1%)	1.0% (London average = 0.5%)	0.0% (London average = 0.5%)	0.0% (London average = 0.0%)	0.5% (London average = 0.1%)

What information is shown here?

The information on this page and the following shows the level of recorded crime in Heathside & Lethbridge, Lewisham and comparator areas. This is based on data for individual crime incidents published via the www.police.uk open data portal, which has been linked by Community Insight to your selected neighbourhoods. Further information on how these crimes and incidents have been categorised, as well as which crimes and incidents have been mapped and why, is available at: www.police.uk/about-this-site/faqs/#why-are-some-crimes-not-displayed-on-the-map

The information boxes show counts and rates for the main crime types and anti-social behaviour incidents. The overall crime rate is presented for monthly, quarterly and annual snapshots, with the underlying crime types shown as annual totals.

The line charts to the right and on the following page track monthly change in recorded crime across five key offences (violent crime, anti-social behaviour, burglaries, criminal damage and vehicle crime) across Heathside & Lethbridge, Lewisham and comparator areas.

Note: Some Police.uk more recent crime counts are not available from various forces over certain time points.

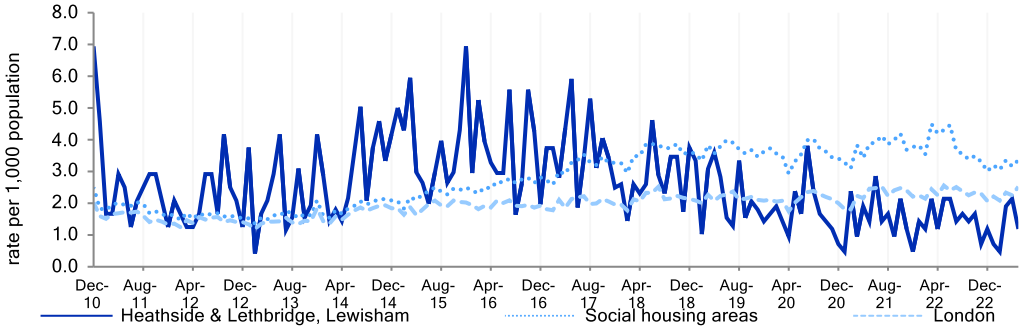

For example; Greater Manchester Police due to a change in IT systems since June 2019 and Devon and Cornwall Police due to moving to a new system in November 2022. Data will be provided when issues are rectified.

Please see https://data.police.uk/changelog/ for more details and for other known issues.

All crimes May 2023 monthly total	All crimes Mar-23 to May-23	All crimes Jun-22 to May-23
28	102	315
5.5 per 1,000 population (London average = 9.7)	17.8 per 1,000 population (London average = 30.1)	74.9 per 1,000 population (London average = 110.7)

What information is shown here?

The information in this section explores variations in life expectancy and premature mortality. Life expectancy is a measure of the age a person born today can expect to live until, if they experience current mortality rates throughout their life. The chart on the right shows life expectancy at birth for females and males in Heathside & Lethbridge, Lewisham and comparator areas.

The first chart on the following page shows the standardised mortality ratio for all causes and all ages for Heathside & Lethbridge, Lewisham. This indicator highlights the ratio of observed to expected deaths (given the age profile of the population). A mortality ratio of 100 indicates an area has a mortality rate consistent with the age profile of the area, less than 100 indicates that the mortality rate is lower than expected and higher than 100 indicates that the mortality rate is higher than expected.

The second chart on the following page show incidence of cancer (with breakdowns for the most common forms of cancer). The data is presented as an incidence ratio (ratio of observed incidence vs expected incidence given the age profile of the population).

Figure: Life expectancy

What information is shown here?

The information in this section looks at general levels of health, focusing on the number of people living in neighbourhoods with poor levels of overall health (health deprivation hotspots) and the number of people who are disabled with a limiting long-term illness where the day-to-day activities limited.

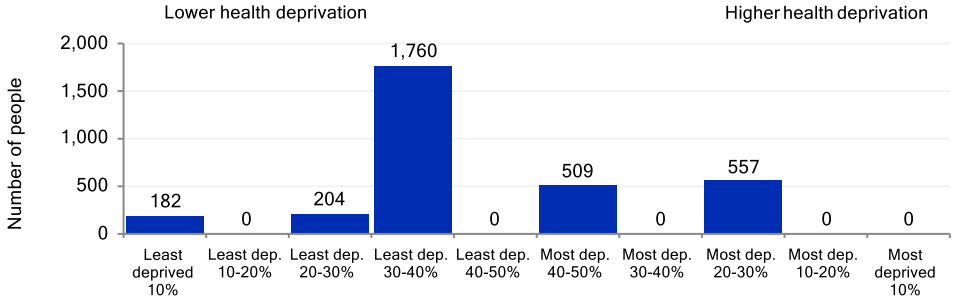

Limiting long-term illness is defined as any long-term illness, health problem or disability which limits someone's daily activities or the work they can do. Health deprivation 'hotspots' are neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on the Indices of Deprivation 2019 Health domain. The domain measures morbidity, disability and premature mortality. All neighbourhoods in England are grouped into ten equal sized groups "deciles"; the 10% of neighbourhoods with the highest level of health deprivation are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of health deprivation grouped in decile 1.

The chart on the right shows the number of people in Heathside & Lethbridge, Lewisham living in each health decile. The charts on the following page show the proportion of residents in Heathside & Lethbridge, Lewisham with a limiting long-term illness, including by housing tenure.

The third chart on the following page shows the proportion of babies born with a low birth weight in the local area and comparator areas. Low birth weight is defined as a birth weight of less than 2500 grams.

Number of people living in health deprivation 'hotspots' (Indices of Deprivation 2019 – Communities and Local Government)	Disabled under the Equality Act: Day-to-day activities limited (Census 2021)		
0	536		
-(London average = 3.2%)	13.2% (London= 13.2%)

What information is shown here?

The information in this section looks at admissions to hospital by main health condition and hospital admissions and A&E attendance rates for children (aged under 5 years). The chart on the top right shows emergency admissions to hospital across Heathside & Lethbridge, Lewisham and comparators. The chart on the bottom right shows elective in-patient hospital admissions (admissions that have been arranged in advance).

The data are presented as standardised ratios; a ratio of 100 indicates an area has an admission rate consistent with the national average, less than 100 indicates that the admission rate is lower than expected and higher than 100 indicates that the admission rate is higher than expected.

The information boxes at the bottom show the rate of emergency hospital admissions and A&E attendances for children (aged under 5 years) per 1,000 resident population in Heathside & Lethbridge, Lewisham. Approximately 35% of all admissions in the NHS in England are classified as emergency admissions, costing approximately £11 billion a year. Over one quarter of emergency hospital admissions in children aged under 5 years in 2014/15 was for respiratory infections. A&E attendances in children aged under five years are often preventable, and commonly caused by accidental injury or by minor illnesses which could have been treated in primary care.

Emergency hospital admissions for children under 5 (per 1,000 population) (2018/2019 - 2020/2021)	A&E attendance for children under 5 (per 1,000 population) (2017/2018 - 2019/2020)

What information is shown here?

Arthritis UK have partnered with Imperial College London to produce modelled estimates of the prevalence of musculoskeletal conditions for MSOAs in England. The estimates were calculated by identifying risk factors, sourcing suitable data sources and using statistical techniques to produce synthetic estimates of the numbers of people with hip osteoarthritis, knee osteoarthritis and back pain.

We have defined percentages consistently with Arthritis UK's methodology. **Knee and hip osteoarthritis figures are expressed as a percentage of the population aged 45 and over. Back pain figures are express as a fraction of the total population.**

People are deemed to have severe pain if they have pain most of the time or they are unable to walk a quarter of a mile unaided or they have previously undergone hip or knee replacement due to arthritis.

For more information visit https://www.arthritisresearchuk.org/arthritis-information/data-and-statistics/musculoskeletal-calculator.aspx

What information is shown here?

The information on this page looks at lifestyle behaviours of people living in Heathside & Lethbridge, Lewisham. Lifestyle behaviours are risk factors which play a major part in an individual's health outcomes and will have varying physical and psychological consequences.

The chart on the top right shows the healthy eating levels (consumption of five or more portions of fruit and vegetables a day among adults) in Heathside & Lethbridge, Lewisham. It also shows smoking prevalence and levels of binge drinking in these areas. Binge drinking is defined as the consumption of at least twice the daily recommended amount of alcohol in a single drinking session (8 or more units for men and 6 or more units for women).

The chart on the bottom right shows the percentage of people children (in reception year and year 6) and adults classified as obese in Heathside & Lethbridge, Lewisham. People are considered obese when their body mass index (BMI) a measurement obtained by dividing a person's weight by the square of the person's height, exceeds 30 kg/m2.

Data for adult health are modelled estimates created from Health Survey for England 2006-2008. This is due to a lack of alternative small-area data for these indicators.

Figure: "Healthy eating" (consumptions of 5+ fruit and veg a day), binge drinking and smoking

What information is shown here?

The information on this page looks at further lifestyle behaviours of people living in Heathside & Lethbridge, Lewisham.

The chart on the top right shows the percentage of children (in reception year and year 6) classified as overweight or obese in Heathside & Lethbridge, Lewisham. This indicator shows the number of children classified as overweight (including obese) where their BMI is on or above the 85th centile of the British 1990 growth reference (UK90) according to age and sex. The indicator can be used to estimate and monitor excess weight and obesity in children in order to reduce prevalence, inform planning and delivery of services for children, and ensure the proper targeting of resources to tackle obesity.

The chart on the bottom right shows the modelled prevalence of smoking status for people aged 15 in Heathside & Lethbridge, Lewisham. It shows the percentage of those aged 15 who are regular smokers or regular or occasional smokers. There is a large body of evidence showing that smoking behaviour in early adulthood affects health behaviours later in life. The Government's Tobacco Control Plan (2017) sets out their aim to reduce the number of 15 year olds who regularly smoke from 8% to 3% or less. This indicator will ensure that as well as focusing on reducing the prevalence of smoking among adults (primarily through quitting) local authorities will also address the issue of reducing the uptake of smoking among children.

What information is shown here?

This chart shows estimates of the levels of physical activity among adults. The data have been produced by Sport England using a Small Area Estimation technique - modelling down from a National Survey (the Active Lives Survey 2020) to Middle Layer Super Output Area (MSOA) based on the local demographic characteristics of the local population. For more information on the modelling method see https://www.sportengland.org/know-your-audience/data/active-lives/active-lives-data-tables

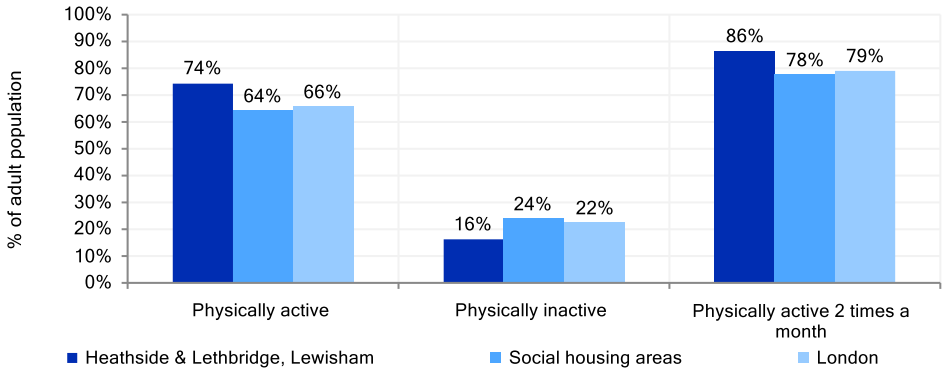

The categories of physical activity follow the guidelines set by the Chief Medical Officer and are defined below:

Physically active: undertaking at least 150 minutes per week in the past month excluding gardening

Physically inactive: undertaking less than 30 minutes in the past month excluding gardening

Physical activity at least twice a month: undertaking physical activity on at least two occasions in the past month

Figure: Physical activity among adults

What information is shown here?

The information on this page looks at the estimated prevalence of a different health conditions in Heathside & Lethbridge, Lewisham.

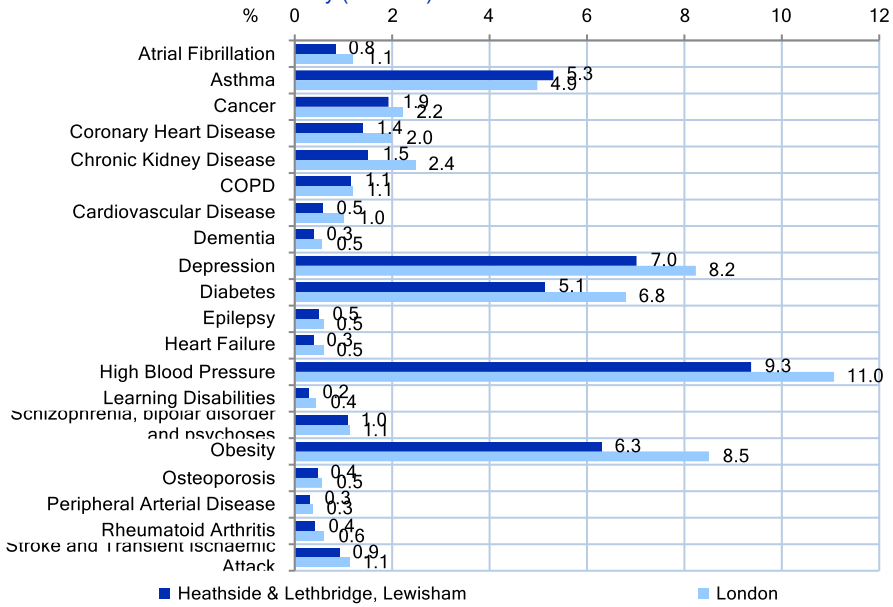

The estimates calculated are based on the number of people listed on GP registers in 2019/20, and the number of people recorded as having the relevant health conditions. The data from England's GP practices was published by NHS digital. As the data is for 2019/20, it may be affected by the beginning of the COVID-19 pandemic.

It should be noted that these are only estimates and that they are sensitive to the accuracy of GP data reporting. For some conditions (e.g. obesity and dementia), GP-recorded prevalence is lower than the proportion of people living with the condition.

For full notes, methodology, and limitations, please see https://commonslibrary.parliament.uk/social-policy/health/diseases/constituency-data-how-healthy-is-your-area for more details.

The bar chart on the right shows a detailed breakdown of the estimated percentage of prevalence by category of health condition.

Health and wellbeing: AHAH index

What information is shown here?

The information on this page looks at the index of 'Access to Health Assets and Hazards' (AHAH) Version 3, a multidimensional index produced by the CDRC that measures how 'healthy' neighbourhoods are by looking at accessibility and geographical determinants of health. It combines indicators under four different domains of accessibility:

- Retail environment: access to fast food outlets, pubs, off-licences, tobacconists and vape stores, gambling outlets,
- Health services: access to GPs, hospitals, pharmacies, dentists, leisure services, and
- Physical environment: access to Blue Spaces, Green Spaces - Passive (total green space areas available to each postcode in a range of a 900-metre buffer prior to creating LSOA averages),
- Air Quality: three air pollutants (Nitrogen Dioxide, Particulate Matter 10 and Sulphur Dioxide).

The information boxes on the top right show the score on each of the four domains of accessibility and the overall AHAH index score for Heathside & Lethbridge, Lewisham. A higher score indicates a poorer health-related environment.

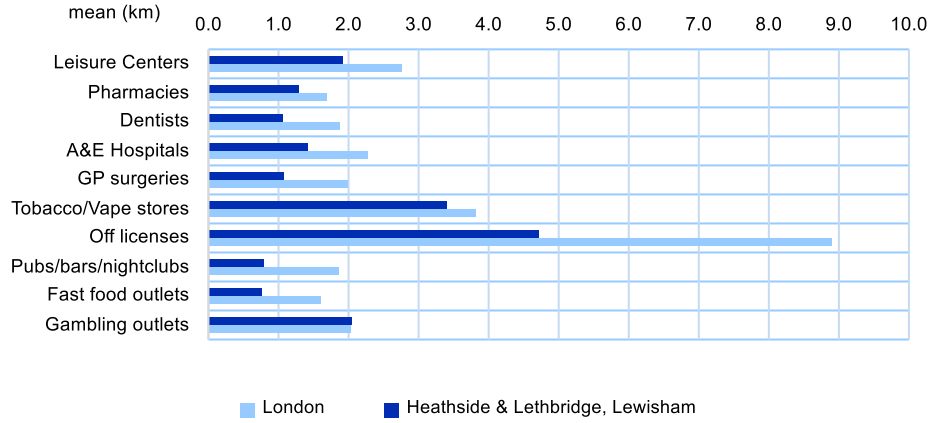

The bar chart on the right shows a detailed breakdown of the inputs for the retail environment and health services domains all of which show the mean distance in kilometres to each of these outlets and services.

For full notes, methodology, and limitations please see https://data.cdrc.ac.uk/dataset/access-healthy-assets-hazards-ahah for more details.

AHAH Retail Environment domain (CDRC 2022)	AHAH Health Services domain (CDRC 2022)	AHAH Physical Environment domain (CDRC 2022)
1.1	-1.2	-0.2

What information is shown here?

The information on this page shows the outcomes of children in the Early Years Foundation Stage (EYFS), a series of tests measuring children's progress in terms of Personal, Social and Emotional Development (PSED) and Communication, Language and Literacy (CLL). These are typically 5-year-old pupils; however, a minority of slightly older and younger pupils may have been assessed.

The new Early Years Foundation Stage Profile requires practitioners to make a best fit assessment of whether children are emerging, expected or exceeding against each of the new 17 Early Learning Goals (ELGs). Children have been deemed to have reached a Good Level of Development (GLD) in the new profile if they achieve at least the expected level in the ELGs in the prime areas of learning (personal, social and emotional development; physical development; and communication and language) and in the specific areas of mathematics and literacy. These are 12 of the 17 ELGs. The Department for Education has also introduced a supporting measure which measures the total number of points achieved across all 17 ELGs and reports the average of every child's total point score.

The chart on the right shows the percentage of pupils achieving 17 ELG and the percentage of pupils achieving a good level of development.

Note: *Most recent EYFS data is currently not available for geographical areas used by the Local Insight tool. However, you can find Local Authority level data at: https://explore-education-statistics.service.gov.uk/find-statistics/early-years-foundation-stage-profile-results*

What information is shown here?

The information on this page looks at four types of income category: average household income; average equivalised household income after housing costs; households living in fuel poverty and median net equivalised household PAYE and benefits income. Fuel poverty is said to occur when in order to heat its home to an adequate standard of warmth a household needs to spend more than 10% of its income on total fuel use.

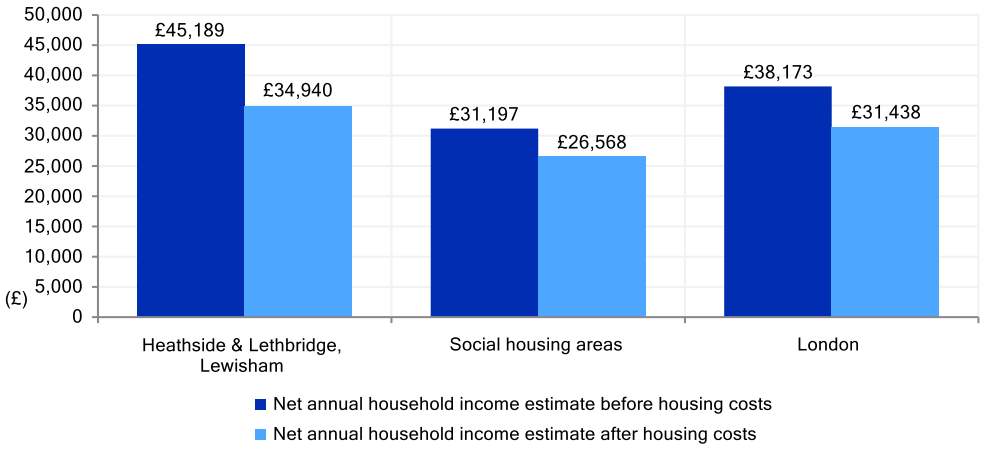

The information boxes on the top right provide an estimate of the number of households in Heathside & Lethbridge, Lewisham below the poverty line and an estimate for the number of households in fuel poverty.

The chart on the right shows the average annual household income estimate (equivalised to take into account variations in household size) across Heathside & Lethbridge, Lewisham and comparator areas before and after housing costs.

Annual household income (Office for National Statistics 2017/18)	Annual household income, after housing costs (Office for National Statistics 2017/18)	Households living in 'Fuel Poverty' Department for Business, Energy and Industrial Strategy (2021)
£60,292	£34,940	160
London Average = £53,368	London Average = £31,438	8.1% of households (London = 11.9%)

Median net equivalised household PAYE and benefits income (Office for National Statistics 2015/16)

What information is shown here?

The levels of private debt, in the form of unsecured loans and mortgage debt per head, for Heathside & Lethbridge, Lewisham are displayed here.

These figures, available at postcode sector level, are published by UK Finance and account for around 60% of borrowing in the UK. OCSI have modelled this data to Output Areas using an address-based lookup from postcode sector to Output Area in combination with the number of local households and the local population.

The personal debt figure is the total amount of borrowing outstanding on customer accounts divided by the population aged 18+. Personal debt includes all unsecured loans such as credit cards, credit for new cars (eg when buying on finance) and other personal loans. Student debt is not included.

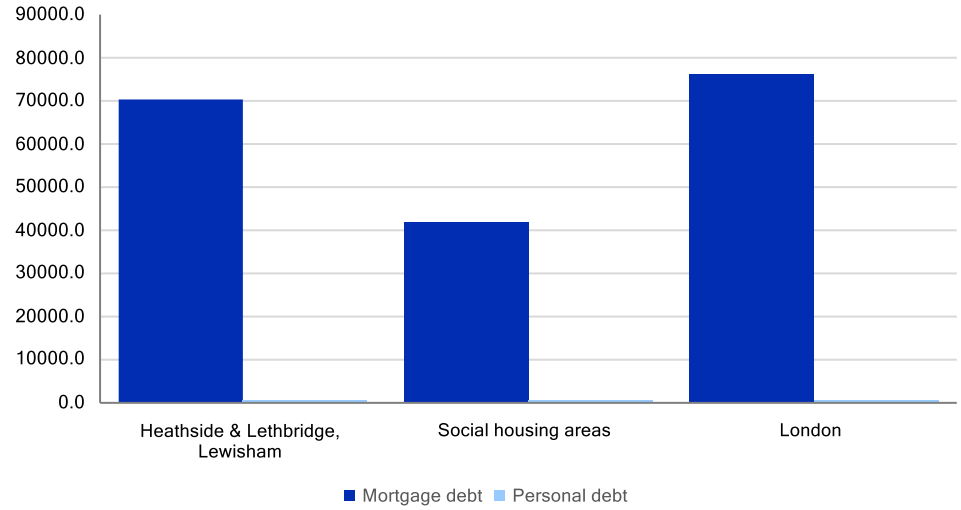

The mortgage debt figure is the total borrowing outstanding on customer accounts for residential mortgages divided by the total number of households.

The SME debt figure is the total amount of borrowing outstanding on customer accounts for Small and Medium-sized enterprises divided by the population aged 18+.

Personal debt per head	Residential mortgage debt per head	SME lending debt per head
£502.0	£70320.9	£814.0
London Average = £525.1	London Average = £76216.9	London Average = £2950.7

What information is shown here?

The information in this section shows the concentration of 'local business units' in Heathside & Lethbridge, Lewisham. 'Local business units' are counts of businesses based on the location of an operational unit. Though larger businesses such as supermarket chains may have their head office in a large city, these figures measure all subsidiaries of that larger enterprise based on where subsidiaries are located. The figures cover all business eligible for VAT (1.7 million businesses in the UK are registered for VAT). These businesses are categorised into 16 broad industry groups derived from the Standard Industrial Classification (UKSIC (2003)).

The information boxes show the three largest industry groups for businesses based in Heathside & Lethbridge, Lewisham. The line chart shows the change in the number of businesses per head of the population across Heathside & Lethbridge, Lewisham over time. The bar chart shows the count of local business broken down by size of business. Businesses are broken down into four employment size bands based on the number of paid employees (0-4, 5-9, 10-19 and 20+ paid employees).

What information is shown here?

The information on this page shows the accessibility of key services and amenities to people living in Heathside & Lethbridge, Lewisham. Accessibility is measured both in terms of distance and travel times to key services.

The information boxes on the right show average distances (in kilometres) to five key services. The chart on the right shows average travel times in minutes to key services when walking or taking public transport.

Job access score: This measure of connectivity developed by UK Onward includes the number of jobs accessible by car and public transport from every local area (LSOA) in the country across different time horizons. The metric provides the reachable number of jobs and distance with 15 minutes, 30 minutes, 60 minutes and 90 minutes by both driving and public transport for each LSOA.The data incorporates a “door-to-workplace” measure, including every journey stage from time spent walking to the car, driving, to parking and walking to an office - as well as average delays, timetabling and actual journey time on public transport. These measures have been combined into an overall Jobs access score, the weighted average job count, combining driving and public transport. A higher score indicates greater levels of job accessibility. For more information and a link to the research paper please see here: https://www.ukonward.com/reports/network-effects/

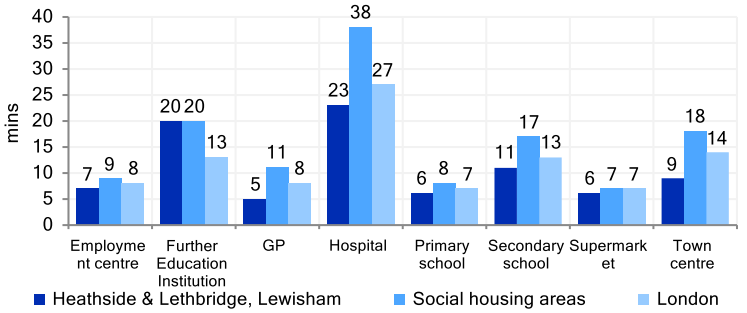

The final information box shows the Priority Places for Food Index by rank, a composite index formed of data compiled across seven different dimensions relating to food insecurity for the four nations in the UK. It is constructed using open data to capture complex and multidimensional aspects of food insecurity.

Average road distance from Job Centre	Average road distance from Secondary School	Average road distance from GP	Average road distance from Pub	Average road distance from Post Office
1.4km	0.6km	0.2km	0.2km	0.7km
London average = 2.3km	London average = 1.1km	London average = 0.5km	London average = 0.6km	London average = 0.7km

Job Access Score (2021)	Priority Places for Food Index (Rank) (2022)
1255971.4	27,422
London average = 1215718.8	London average = 21,529

What information is shown here?

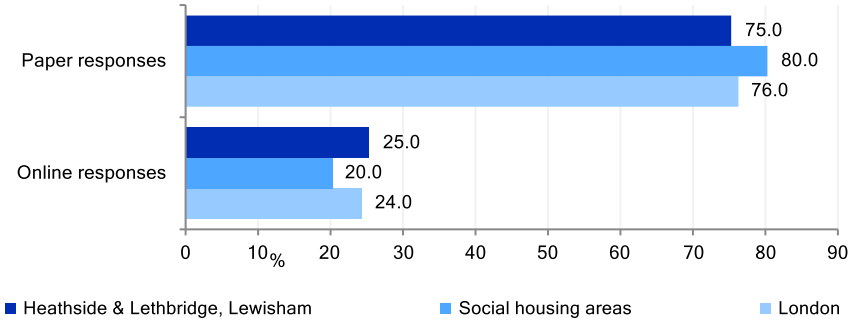

The information on this page shows two measures of access to the internet. The first measure shows information on broadband take-up, speeds and availability. It has been produced by Ofcom and contains data provided by communications providers. The data shows the average broadband line speed in Heathside & Lethbridge, Lewisham and the proportion of premises in Heathside & Lethbridge, Lewisham with broadband speeds below the Universal Service Obligation (USO) (download speeds at or above 10Mbit/s and upload speeds at or above 1Mbit/s including non-matched records and zero predicted speeds).

The chart on the right shows the proportion of people who responded to the 2011 Census online, compared with the proportion that filled in the Census form on paper in Heathside & Lethbridge, Lewisham. This is a proxy measure of digital engagement as areas with a high proportion of online Census responses are more likely to be digitally engaged than those in areas with low levels of online responses.

Premises with broadband speeds below the USO (2019)	Average download broadband speed (Mbit/s) (2020)	Average upload broadband speed (Mbit/s) (2020)
00	65.16	11.37
0.0% (London average = 0.7%)	London average = 77.17	London average = 12.03

What information is shown here?

The information on this page looks at the characteristics of neighbourhoods across Heathside & Lethbridge, Lewisham as defined using the Output Area Classification (OAC). OAC classifies every area in the country based on a set of socio-demographic characteristics, to provide a profile of areas to identify similarities between neighbourhoods. The information boxes on the right show the number and proportion of neighbourhoods in Heathside & Lethbridge, Lewisham that fall within the eight supergroup categories, detailed below. The chart on the right shows the proportion of areas falling within supergroup categories across Heathside & Lethbridge, Lewisham and comparators.

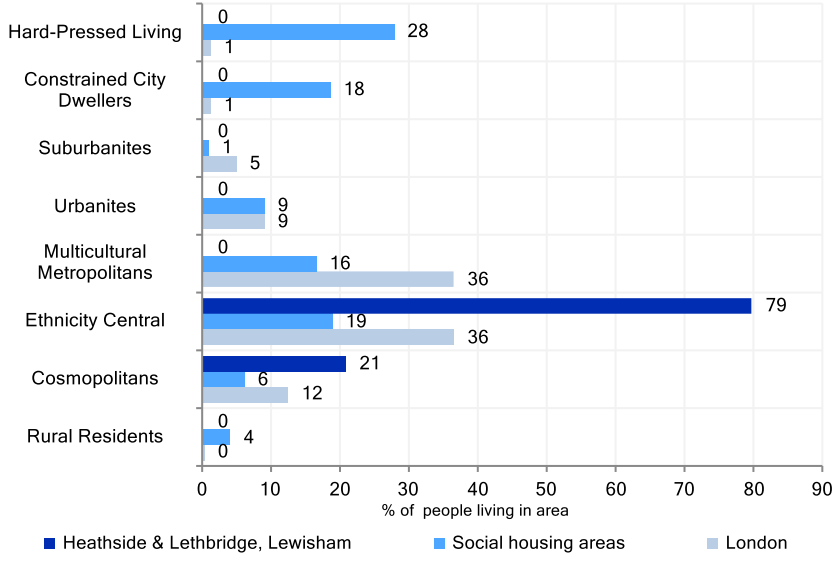

Rural residents	Rural areas, sparsely populated, above average employment in agriculture, higher number owning multiple cars, an older married population, a high provision of unpaid care and an above average number of people living in communal establishments.
Cosmopolitans	Residing in densely populated urban areas, high ethnic integration, high numbers of single young adults without children including students, high public transport use, above average qualification levels
Ethnicity central	Concentrated in Inner London and other large cities, high ethnic diversity, high proportion of rented accommodation, high proportion of people living in flats, low car ownership.
Multicultural metropolitans	Concentrated in larger urban conurbations in the transitional areas between urban centres and suburbia, high proportion of BME groups, high proportion of families.
Urbanites	Predominantly in urban areas with high concentrations in southern England. More likely to live in either flats or terraces that are privately rented.
Suburbanites	Located on the outskirts, in areas with high owner occupation, high numbers of detached houses, low unemployment, high qualifications and high car ownership.
Constrained city dwellers	Higher proportion of older people, households are more likely to live in flats and to rent their accommodation, and there is a higher prevalence of overcrowding, higher proportion of people in poor health, lower qualification levels and high unemployment
Hard-pressed living	Mostly on the fringe of the UK's urban areas, particularly in Wales and the North of England. High levels of people in terraced accommodation, high unemployment, low ethnic diversity, high levels of people employed in manufacturing

Rural residents	Cosmopolitans	Ethnicity central	Multicultural metropolitans
0	494	1,905	0
0.0% (London average = 0.1%)	20.6% (London average = 12.2%)	79.4% (London average = 36.2%)	0.0% (London average = 36.2%)

Urbanites	Suburbanites	Constrained city dwellers	Hard-pressed living
0	0	0	0
0.0% (London average = 8.8%)	0.0% (London average = 4.7%)	0.0% (London average = 0.9%)	0.0% (London average = 1.0%)

What information is shown here?

The information on this page looks at the classification of neighbourhoods across Heathside & Lethbridge, Lewisham in terms of how they interact with the Internet. The Consumer Data Research Centre (CDRC) have developed an Internet User Classification using data from the British Population Survey (BPS), which provides info on the behavioural characteristics of the population regarding various aspects of internet use, which could be linked with demographic data from the census and supplemented with data from online retailers, on online transactions and infrastructure data from OfCom on download speed. Every LSOA in England has been classified into 10 groups (summarised in the table below). The chart on the right shows the proportion of areas falling within each group across Heathside & Lethbridge, Lewisham and comparators.

Source: *Alexiou, A. and Singleton, A. (2018). ESRC Consumer Data Research Centre; Contains National Statistics data Crown copyright and database right (2017); Ofcom data (2016). CDRC data from Data Partners (2017)*

Figure: Internet User Classification 2018: Proportion of people living in different types of neighbourhood (by classification type)

e-Cultural Creators	High levels of Internet engagement, particularly regarding social networks, communication, streaming and gaming, but relatively low levels of online shopping, besides groceries.
e-Professionals	High levels of Internet engagement, and comprises fairly young populations of urban professionals, typically aged between 25 and 34. They are experienced users and engage with the Internet daily and in a variety of settings.
e-Veterans	Affluent families, usually located within low-density suburbs, with populations of mainly middle-aged and highly qualified professionals. Higher levels of engagement for information seeking, online services and shopping, less for social networks or gaming.
Youthful Urban Fringe	Reside at the edge of city centres and deprived inner-city areas, ethnically diverse, young, large student and informal household populations, access via mobile devices. High levels of Internet engagement are average over-all, with high levels of social media usage
e-Rational Utilitarians	Comprising mainly rural/semi-rural areas with higher than average retired populations, constrained by poor infrastructure. Users undertake online shopping; the Internet is used as a utility rather than a conduit for entertainment.

e-Mainstream	Exhibit typical Internet user characteristics in heterogeneous neighbourhoods at the periphery of urban areas or in transitional neighbourhoods.
Passive and Uncommitted Users	Limited or no interaction with the Internet. They tend to reside outside city centres and close to the suburbs or semi-rural areas. Higher levels of employment in semi-skilled and blue-collar occupations.
Digital Seniors	Typically, White British, retired and relatively affluent. Average use of the Internet, typically using a personal computer at home. Despite being infrequent users, they are adept enough to use the Internet for information seeking, financial services and online shopping.
Settled offline Communities	Elderly, White British, in semi-rural areas. They undertake only limited engagement with the Internet, they may have only rare access or indeed no access to it at all.
e-Withdrawn	Least engaged with the Internet. Deprived neighbourhoods of urban regions. Highest rate of unemployment and social housing among all Lowest rates of engagement in terms of information seeking and financial services, as well as the lowest rate in terms of online access via a mobile device.

Communities and environment: Neighbourhood satisfaction & local participation (1) 64

What information is shown here?

The information on this page shows different measures of people's satisfaction with their neighbourhood and their sense of community cohesion in the neighbourhood. It also shows different measures of people's participation in volunteering and political decision making in the local area. In addition, the information box on the far bottom right shows the number of registered charities per 1,000 population. This is based on location of charities rather than areas where they operate, some of which will have a global focus.

Figures are self-reported and taken from the Place Survey. The Place survey is collected at Local Authority level so does not include neighbourhood information, and ceased nationally in 2008 so is increasingly out of date.

"People from different backgrounds get on well together in the local area"	People who feel that they belong to their neighbourhood	People who are satisfied with local area as a place to live	Aged 65+ "satisfied with both home and neighbourhood"
75%	50%	74%	77%
(London = 76%)	(London = 52%)	(London = 74%)	(London = 76%)

People involved in decisions that affect the local area in the past 12 months	People who believe they can influence decisions in their local area	People who have given unpaid help at least once per month over the last 12 months	Total registered charities (2021)
15%	35%	19%	3.8 per 1,000 population
(London = 17%)	(London = 35%)	(London = 21%)	(London = 3.5 per 1,000)

What information is shown here?

This page shows the Community Dynamics indicators for Heathside & Lethbridge, Lewisham. The Community Dynamics data set (https://www.communitydynamics.social-life.co/) has been developed by Social Life with the aim of quantifying how people feel about the area they live in.

By modelling responses from the annual Community Life Survey and Understanding Society Survey to Output Areas, Social Life have created small area measures of: **strength of local social relationships**, **strength of belonging to a local area** and **satisfaction with a local area as a place to live**.

Positive values represent greater belonging/relationship strength/satisfaction than the national average. Negative figures represent less belonging/relationship strength/satisfaction than the national average.

Please note that these indicators have been created by combining the survey responses of samples of the population and modelling these to Output Areas by linking survey sample demographics to the demographics of Output Areas. As a result, many implicit assumptions are built into the data which will not hold for all areas.

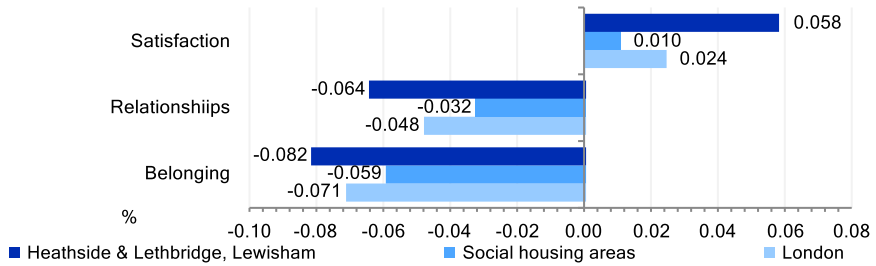

The values presented here offer an indication of community belonging, strength and satisfaction rather than an absolute measure.

The fourth information box shows the valid voter turnout (%) at the most recent Local Council Elections. Because the electoral cycle varies in different parts of the country (with associated impacts on turnout) the turnout figures from previous years have been adjusted either upwards or downwards from the 2019 average. This is in order to reflect variation in turnout across different years. For example if turnout was 30% in 2018 and 35% in 2019 than each area in 2018 would be revised upwards using the following calculation 35/30 = 1.166*2018 turnout.

Local social relationships	Belonging	Satisfaction with local area as a place to live	Voter Turnout at Local Elections (%)
-0.064	-0.082	0.058	37.5
(London = -0.048)	(London = -0.071)	(London = 0.024)	(London = 36.1%)

Figure: Community Dynamic scores for belonging, relationships and satisfaction

What information is shown here?

The information on this page shows background concentrations from four air pollutants: nitrogen dioxide, benzene, sulphur dioxide and particulates. The air quality data was collected for 2016 on a 1km grid and obtained from the UK National Air Quality Archive for use in the Indices of Deprivation 2019. A higher score indicates a higher concentration of the pollution with a score of greater than 1 indicating that the levels of pollution exceed national standards of clean air.

The fifth information box shows the total carbon footprint per person in units of kilogrammes of carbon dioxide equivalent. This data is sourced from the place-based carbon calculator. For more information please visit: https://www.carbon.place/.

Figure: Air pollution concentrations for four pollutants

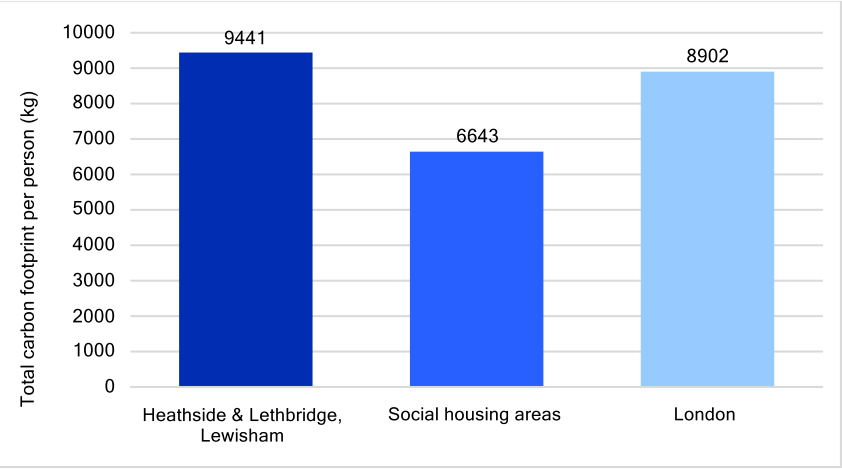

Source: Communities and Local Government (Indices of Deprivation 2019 – from National Air Quality Archive 2016)

Benzene concentrations	Nitrogen Dioxide concentrations	Particulates (PM10) concentrations	Sulphur Dioxide concentrations	Total carbon footprint per person (kg)
0.14	0.7	0.5	0.03	9441
(London average = 0.13)	(London average = 0.7)	(London average = 0.5)	(London average = 0.03)	(London average = 8902)

What information is shown here?

The information on this page shows measures of green space and tree canopy cover.

Ordnance Survey (OS) publish the locations and extent of green spaces that are likely to be accessible to the public. The data include the following types of green spaces: allotments or community growing spaces, bowling greens, cemeteries, religious grounds, golf courses, other sports facilities, play spaces, playing fields, public parks or gardens and tennis courts.

OCSI have intersected OS Open Greenspaces data with Output Area boundaries to produce data for the greenspace per standard geographical area (eg OA, LSOA, LA).

Two green space measures are shown here. The **total green space** (which includes all types of green space) and the **public parks and gardens green space** (only public parks and gardens).

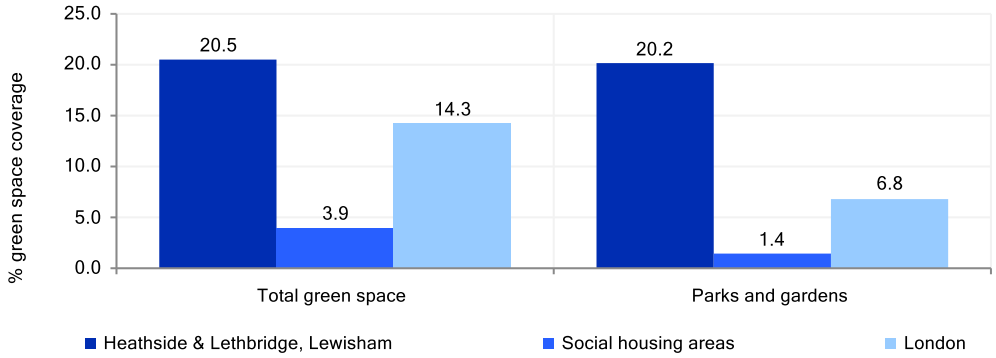

Large rural areas such as National Parks are not included in the OS Greenspace dataset. Religious grounds are included where there is seen to be a significant amount (>500m2) of accessible greenspace. Sports stadiums and grounds which are primarily for spectating rather than participating in sports are not included. Playing fields should only be included in OS Greenspace dataset where they are used by the public at least some of the time. Playing fields such as school fields which are entirely enclosed and only for use of the school, would not be expected to be included. Wooded areas that function as public parks (i.e. are freely accessible to the public in their entirety and are managed for recreation) should be included, however, the constraints of the capture method employed to create the data mean that in many cases these may not yet be included.

The **percentage of tree canopy area** is derived from Environment Agency National LiDAR Programme data and National Forest Inventory 2020 data at 1m spatial resolution. Tree canopy algorithm development and data processing were done by Terra Sulis Research CIC on behalf of Friends of the Earth.

Total green space	Public parks and gardens greenspace	Tree cover (%)
20.5%	20.16%	17.6
6.7 hectares (London average = 14.3%)	6.6 hectares (London average = 6.8%)	(average = 16.8)

Source: OS data © Crown copyright and database right 2017 / Friends of the Earth 2022

What information is shown here?

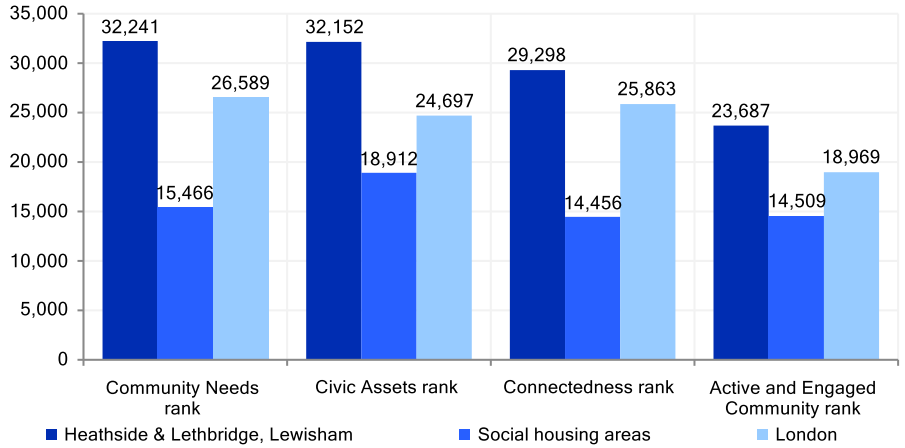

The Community Needs Index that was developed to identify areas experiencing poor community and civic infrastructure, relative isolation and low levels of participation in community life. The index was created by combining a series of 28 indicators, conceptualised under three domains: Civic Assets, Connectedness and Active and Engaged Community. A higher rank indicates that the area has relatively higher levels of need.

- Civic Assets: measures the presence of key community, civic, educational and cultural assets in a close proximity of the area. These include pubs, libraries, green space, community centres, swimming pools – facilities that provide things to do often, at no or little cost, which are important to how positive a community feels about its area
- Connectedness: measures the connectivity to key services, digital infrastructure, isolation and strength of the local jobs market. It looks at whether residents have access to key services, such as health services, within a reasonable travel distance. It considers how good public transport and digital infrastructure are and how strong the local job market is.
- Active and Engaged Community: measures the levels of third sector civic and community activity and barriers to participation and engagement. It shows whether charities are active in the area, and whether people appear to be engaged in the broader civic life of their community.

Community Needs Rank	Civic Assets Rank	Connectedness Rank	Active and Engaged Community Rank
32,241	32,152	29,298	23,687
(London average = 26,589)	(London average = 24,697)	(London average = 25,863)	(London average = 18,969)

What information is shown here?

This page looks at funding and includes data on the National Lottery Fund and grant funding from national grant giving organisations.

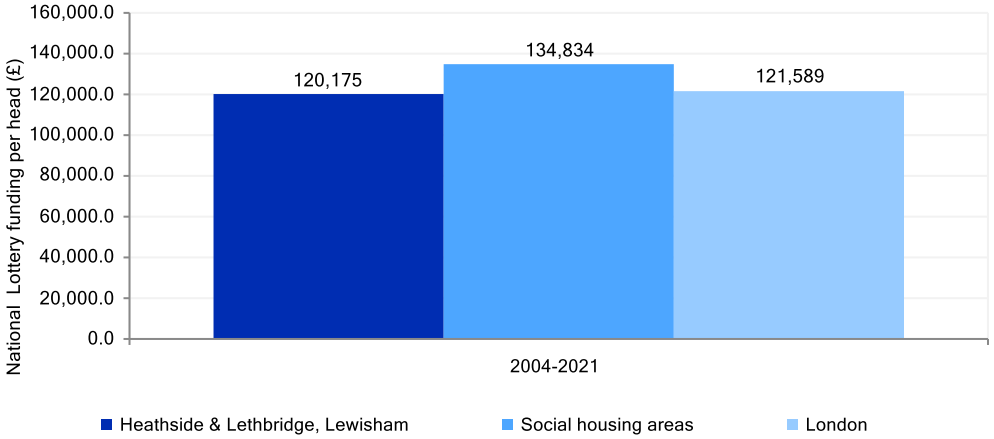

National Lottery Community Fund figures on this page are taken from data on grants made to projects and organisations in local areas in the UK by the National Lottery Fund, modelled down to standard statistical geographies from ward grants data published by Big Lottery in conjunction with the 360Giving initiative. National Lottery used the 360Giving standard to produce a dataset of all the grants made from 2004-2021. Please note this excludes grants greater than 1 million in order to focus on community grants.

The fourth information box shows the total combined grant funding from the largest national grant giving organisations whose data has been subject to the 360giving standard. The data is based on the location of grant recipients rather than the location of beneficiaries. Organisations included: Sport England, The Henry Smith Charity, The Tudor Trust, Lloyds Bank Foundation for England and Wales, Barrow Cadbury Trust, Department for Transport, Esmée Fairbairn Foundation, Masonic Charitable Foundation, Nationwide Foundation, Co-operative Group, Paul Hamlyn Foundation, Woodward Charitable Trust, Power to Change, The Dulverton Trust, Virgin Money Foundation, The Clothworkers Foundation, A B Charitable Trust, Seafarers UK, Three Guineas Trust, Nesta, The Joseph Rank Trust, National Churches Trust, LandAid Charitable Trust, True Colours Trust, Pears Foundation, Wates Family Enterprise Trust, The Blagrave Trust, Tuixen Foundation, Samworth Foundation, Tedworth Charitable Trust, Road Safety Trust, Wates Foundation, Staples Trust, The David & Elaine Potter Foundation, Gatsby Charitable Foundation and ZING. For more information on the 360Giving data format and initiative please visit www.threesixtygiving.org/

National Lottery Community funding per 1,000 population (2004-2021)	National Lottery Community Fund (Individual grants issued per 10,000 population) (2004-2021)	Total grants awarded from major funders (in £1000s) (2019)
£120,175	33	£50,950
(£120175 per 1,000) London average = £121589 per 1,000	(33 per 10,000) London average = 26 per 10,000	(£13 per head) London average = £65 per head

Appendix A: About the data and geographies used in this report

How we have identified the "Heathside & Lethbridge, Lewisham" area

This report is based on the stock property location data (postcodes) loaded into Community Insight by Peabody, and the definition of the "Heathside & Lethbridge, Lewisham" area (you can view this area on the Community Insight tool, either in the drop-down menu at the top-left of the map-page, or on the "Stock group" page if you are logged-in as an administrator). We have aggregated data for all the neighbourhoods in "Heathside & Lethbridge, Lewisham" that contain stock, to create the data used in this report.

Data in this report is based on regularly updated open data published by government sources

All the data in this report is based on open data published by more than 50 government agencies, collected and updated by OCSI on weekly basis. Data is updated on regular basis, with the reports and mapped data on the website reflecting the latest available data.

Details of the individual datasets are provided on the pages where the data is presented, with information on dates and sources presented alongside the charts and tables. On the website, information about each source is available on the popup "About the indicator" link at the top-right of the map.

Standard geographies used in this report

Super Output Areas (SOAs): SOAs are a statistical geography created for the purpose of presenting data such as the Census, Indices of Deprivation, and other neighbourhood statistics. There are two layers to the SOA geography: 'lower layer' (LSOA) and 'middle layer' (MSOA). SOAs are designed to produce areas of roughly equal population size - 1,500 people for LSOAs and 7,200 for MSOAs. The majority of data used in this report is based on LSOA boundaries; of which there are 32,844 in England (there were changes to around 4% of LSOA definitions in Census 2011).

Output Areas (OAs): OAs are a more detailed statistical geography than SOAs, with each covering around 300 people, or 120 households. There are 171,372 OAs in England (there were changes to around 5% of OA definitions in Census 2011).

Wards: A small number of datasets are published at ward level. These are on average four times larger than LSOAs. Data is less detailed than LSOA level datasets and wards vary greatly in size, from less than 200 residents (Isles of Scilly), to more than 36,000 residents (in Sheffield).

© OCSI/HACT 2023.

Community Insight gives you the data and analysis you need to ensure your services are underpinned by the best possible knowledge of local communities, levering the power of information right across your organisation, from high-level visualisations for Board level to detailed reports on local neighbourhoods. Saving you time and money, Community Insight gives you the most relevant and up-to-date data on the communities where you work, with no need to invest in specialist mapping and data staff, consultancy or software. See www.communityinsight.org for more information.

Community Insight is developed jointly by HACT and OCSI.

HACT helps housing providers build stronger neighbourhoods and resilient communities. We believe housing providers are the foundation for changing people's lives for the better. We seek to influence housing practice and policy to transform lives and strengthen the resilience of communities. See www.hact.org.uk for more information.

OCSI work with public and community sector organisations to improve services. We turn complex datasets into engaging stories; making data, information and analysis accessible for communities and decision-makers. See www.ocsi.co.uk for more information.
